Professional Summary

Detail-driven operations and data professional with 2.5+ years of experience processing, validating, and quality-checking large volumes of digital data for AI/ML and enterprise projects. Progressed from an individual contributor to Team Lead, managing a 10-member team, onboarding 15+ new hires, and maintaining a 90%+ quality track record across every project handled. Skilled at building repeatable workflows, writing clear process documentation, and coordinating between internal teams and external stakeholders to hit deadlines without sacrificing accuracy. Comfortable picking up new tools and domains quickly, having worked across image, video, text, and geospatial data.

Skills

Team Leadership & Training: Team Leadership, Project Management, Staff Onboarding, Training & Mentoring, Task Delegation, Performance Monitoring
Data Quality & Accuracy: Data Verification, Data Validation, Multi-Tier Quality Checking, Error Identification & Correction, Root-Cause Analysis
Process & Documentation: SOP Writing, Process Documentation, Workflow Design, Ontology / Classification Structure Design, Process Improvement
Coordination & Communication: Stakeholder Coordination, Cross-Team Communication, Deadline Management, Independent & Team-Based Work
Software & Tools: Google Workspace, MS Word, Labelbox, CVAT, Label Studio, Labelme, QGIS, File & Record Management

Professional Experience

Labelbees *Oct 2023 – Mar 2026*
AI Data Operations Specialist / Team Lead

- Progressed from an individual contributor to Team Lead, managing a **10-member team** and distributing daily workloads to meet project deadlines.
- Maintained a **90%+ quality track record** by designing and running structured, multi-tier quality-checking processes.
- Owned end-to-end project delivery: planning data collection, defining classification structures, writing work instructions, and reviewing final output before submission.
- Trained and onboarded **15+ team members**, bringing new hires up to production speed on tools and quality expectations.
- Created and maintained process documentation and guidelines used across the team to standardize work quality.
- Acted as the main point of contact between internal teams and external stakeholders to align on requirements and timelines.
- Spotted recurring bottlenecks in the workflow and introduced process changes that reduced errors and turnaround time.
- Processed, verified, and validated large volumes of digital data (image, video, text, and geospatial) across multiple client projects using tools including Labelbox, CVAT, Label Studio, and QGIS.
- Followed detailed project guidelines to ensure data was accurate, consistent, and delivered on schedule.

Education

B.E. in Computer Science & Engineering 2023
Anna University, Mahendra Engineering College for Women *80%*
