PROFESSIONAL SUMMARY

Aspiring a BE in Electronics and Communication Engineering, with a strong foundation in PLC, VLSI, and core electronics concepts. Hands-on VLSI internship exposure to real-time industrial workflows, complemented by programming proficiency in Python and C. Demonstrated ability to design hardware-oriented solutions, including a Verilog HDL-based CRC error detection system. A quick learner with strong analytical thinking and problem-solving skills, seeking to contribute effectively to a core electronics or embedded systems role.

EDUCATION

Kongunadu College of Engineering and Technology 2023 – 2027
BE, Electronics and Communication Engineering-6.23 CGPA

Sowdambika Matriculation Boys Higher Secondary School 2022 – 2023
Higher Secondary -76.83%

Sowdambika Matriculation Boys Higher Secondary School 2020-2021
Senior Secondary- 100%

ACADEMIC PROJECTS

- **Efficient CRC Error Detection for I2C Protocol** (Verilog HDL, Xilinx Vivado): Designed a pipelined, hardware-oriented CRC error detection architecture for I2C communication, improving transmission reliability by efficiently identifying burst and multi-bit errors while minimizing processing delay. Modeled in Verilog HDL and verified through simulation, suitable for low-latency embedded systems.
- **Smart Billing System with Expiry Integration:** Built a barcode-scanning billing application with real-time expiry alerts to prevent the sale of expired products. Designed to automate product validation during billing, reducing manual checks and improving checkout efficiency. Enhanced inventory management and customer safety by ensuring only valid products are processed for sale.

INTERNSHIP EXPERIENCE

VLSI Internship — SD Pro Solutions, Tiruchirappalli | Jun 2025

- Completed an industrial-visit internship training program, gaining hands-on exposure to real-time VLSI design workflows, tools, and industry practices.
- Strengthened understanding of teamwork, technical discipline, and workplace ethics within a professional engineering environment.

TECHNICAL SKILLS

- **Programming Languages:** C, Python
- **Core Electronics:** PLC, VLSI
- **Hardware Tools:** Verilog HDL, Xilinx Vivado
- **Web Technologies:** HTML5, CSS3
- **Design Tools:** Canva, Figma

SOFT SKILLS

- Analytical & Logical Problem Solving
- Team Collaboration & Leadership
- Presentation & Communication
- Adaptability & Continuous Learning
- Time Management & Responsibility

CERTIFICATIONS & TRAINING

- NPTEL Certification: Introduction to Internet of Things
- NPTEL Certification: Introduction to Industry 4.0 and Industrial Internet of Things
- 6-Day Training: PLC Programming for the Manufacturing Industry (VACEE08)
- 6-Day Training: Fundamentals of Embedded Systems (Hands-on)

AREAS OF INTEREST

• Internet of Things • Embedded Systems • VLSI Design
