EDUCATION

2023-2027

BE Electronics and Communication Engineering

Kongunadu College of Engineering and Technology

CGPA: 7.76

SKILLS

TECHNICAL SKILLS:

- PCB Design
- Embedded System
- NLP
- Generative AI
- Machine Learning

PROGRAMMING LANGUAGES:

- Java
- Python
- C
- C++

SKILLS:

- Problem Solving
- Leadership
- Event Organization
- Communication

TOOLS

- Orcad
- Multisim
- VivadoXilinx
- VS code
- Matlab

LANGUAGES

- English
- Tamil

PROFILE SUMMARY

Highly motivated B.E. Electronics and Communication Engineering graduate interested in technology, innovation, and problem solving. I am a quick learner who enjoys exploring new technologies and looking forward to gaining international exposure through higher studies..

PROJECTS

Titile: AI-Based Firefighting Robot

Technologies Used: Arduino UNO, ESP32 CAM Module.

Description:

Developed an AI-based fire-fighting robot using sensors and computer vision to detect and locate fires.

It autonomously navigates, avoids obstacles, suppresses fires, and sends real-time alerts.

Title: Underground Cable Fault Detection

Technologies Used: Arduino UNO, Resistors, Switches.

Description:

Developed an AI-based multilingual assistant that provides farmers with crop, disease, weather, and farming-related guidance.

Uses NLP and AI technologies to understand queries and deliver simple agricultural solutions in regional languages.

Title: AI-Based Government Scheme Recommendation System

Technologies Used: Python, Machine Learning, NLP.

Description:

- Recommends suitable government schemes based on user eligibility and personal details.

- Provides personalized scheme matching, eligibility information, and application guidance.

Title: AI-Based Multi-Language Agricultural Assistan

Technologies Used: Python, Machine Learning, NLP, Generative AI

Description:

Developed an AI-based multilingual assistant that provides farmers with crop, disease, weather, and farming-related guidance.

Uses NLP and AI technologies to understand queries and deliver simple agricultural solutions in regional languages.

INTERNSHIP

I life Technologies

Role:- Web developer

Description:-

Designed and developed responsive web interfaces with a focus on usability and cross-device compatibility.

Worked on front-end development, website testing, debugging, and performance improvements.
