PROFILE

A motivated and enthusiastic Engineering fresher seeking an opportunity to apply my technical knowledge, problem-solving skills, and passion for learning in a challenging organization, while contributing to its growth and enhancing my professional skills.

TECH SKILLS

- VLSI Design
- PCB Design
- Java

AREA OF INTERESTS

- **VLSI & Hardware Design**
- **Iot & Embedded Systems**
- **Full Stack Web Development**

CERTIFICATIONS

- **Introduction to Industry 4.0 IoT:** IIT Kharagpur
- **VAC in Embedded Systems and IoT:** Taras
- **VAC in Core Java Programming:** Yellowmatics
- **VAC in PCB design and Fabrication:** Kncet

LANGUAGES

- English
- Tamil

HOBBIES

- **Solving Puzzles**
- **Traveling**

EDUCATION

Kongunadu College of Engineering and Technology, Thottiyam,
B.E. ECE. 2023 – 2027
CGPA: 8.3/10.0

Sowdambikaa Higher Secondary School, Thottiyam,
Higher Secondary Certification . 2021 – 2023
PERCENTAGE: 87.6/ 100.0

INTERNSHIP

Web Development Intern, *APPIN TECHNOLOGY*
06/2025

- Built static and responsive web pages using HTML, CSS, and JavaScript.
- Applied frontend development concepts to create visually appealing user interfaces.
- Participated in website testing and troubleshooting activities.
- Gained hands-on experience with Git and collaborative development workflows.

PROJECTS

Intelligent Vision and Remote Monitoring System for Food Spoilage Detection
04/2026

- Developed a lowcost IoTbased Food Spoilage Detection System using Arduino Uno, ESP8266, MQ-135, MQ-4,and Load Cell to monitor spoilage gases, weight, temperature, and humidity in real time.
- Built a Python and OpenCVbased monitoring system with a HTML/CSS/JavaScript dashboard for wireless data visualization and food quality analysis.

Smart Parking Slot Detection and Recognition using OpenCV
12/2025

- Smart Parking Slot Detection and Recognition using OpenCV is an image processing project using computer vision to identify occupied/vacant parking slots via webcam footage in lots or garages. It employs edge detection (e.g., Prewitt/Canny), contour analysis, and pixel bounding to mark slots green (empty) or red (occupied), with optional license plate OCR via Tesseract.
- Technologies Used: OpenCV (cv2), NumPy, Python, Flask, CSS, HTML

SOFT SKILLS

- Teamwork
- Time Management
- Decision Making
