joshika03jo@gmail.com

Chitlapakkam, Chennai

## EDUCATION

**2023-2027**
**KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY**

- B.E Electronics and communication engineering
- CGPA: 8.17

**2022-2023**
**SCS MATRICULATION AND HIGHER SECONDARY SCHOOL**

- 72%

## SKILLS

- C
- C++
- Java
- VLSI
- Effective Communication
- Adaptability
- Leadership

## LANGUAGES

- English
- Tamil
- French

## PROFILE SUMMARY

Passionate about technology and lifelong learning, I seek a role that allows me to bridge theoretical knowledge with practical applications, contribute to organizational goals, and build a career defined by growth, innovation, and excellence.

## PROJECTS

**REAL TIME PATIENT DATABASE MANAGEMENT SYSTEM USING GSM**

Tools used: VS code, GSM module, HTML

- Developed a patient management system that stores and manages patient records in a centralized database. Integrated a GSM module to send real-time SMS notifications regarding patient status, appointments, and emergency alerts. Implemented database connectivity for efficient data retrieval, storage, and monitoring.

Role:

- Integrated GSM technology for SMS alert functionality.
- Managed patient data storage and retrieval operations.

**REAL TIME E-VEHICLE BATTERY MONITORING SYSTEM USING GSM**

Tools used: Arduino IDE, GSM module, Arduino UNO

- Developed a real-time battery monitoring system for electric vehicles using Arduino and GSM technology. The system continuously monitors battery voltage and current levels, displays battery status, and sends SMS alerts when battery levels fall below predefined thresholds, enabling efficient battery management and preventive maintenance.

Role:

- Tested and debugged hardware and software components
- Monitored battery parameters in real time and displayed data on the LCD.
- Ensured accurate battery health monitoring and notification delivery
- Programmed the GSM module to send battery status and low-battery alerts

## INTERNSHIP

**RETECH SOLUTIONS, CHENNAI** **JULY 5 – JULY 15 2025**

- Worked on Embedded Systems and Internet of Things (IoT) concepts.
- Developed basic IoT applications using sensors and microcontrollers.
- Interfaced sensors with embedded hardware for real-time data acquisition.
- Learned communication protocols used in IoT systems.
