PROJECT EXPERIENCE

A DEEP LEARNING-BASED EARLY ALZHEIMER'S DISEASE DETECTION USING MAGNETIC RESONANCE IMAGES

- Developed a CNN-based deep learning model to detect and classify Alzheimer's disease using MRI brain images. The system processes MRI scans, extracts important features, and identifies different stages of the disease. The project aims to support early detection and assist medical professionals in making faster and better decisions. Secured 2nd Prize in the Project Expo at Muthayammal College of Engineering.
