Belukurichi, Namakkal

TECHINICAL SKILLS

- Java
- Internet of Things(IoT)

SOFT SKILLS

- Adaptability
- Teamwork
- Time Management
- Leadership
- Effective Communication

PARTICIPATIONS

- Hackathon
- Paper Presentation on :

  Navigating robotic cars,

  Home Intrusion detection
- Workshops on :

  3D Printers,

  AI Cyber Security

AREA OF INTEREST

- Software Development
- Business Analyst

LANGUAGES

- Tamil
- English

CAREER OBJECTIVE

Motivated and results-oriented Electronics and Communication Engineering graduate seeking an entry-level position in the IT industry to apply my technical knowledge, programming skills, and problem-solving abilities while contributing to innovative projects and professional growth.

EDUCATION

B.E ECE - Kongunadu College of Engineering and Technology
2026(Upto 6th semester)
7.5 CGPA

HSC - Kalaimagal Matriculation Higher Secondary School
2023
83%

SSLC - Kalaimagal Matriculation Higher Secondary School
2021
100%

PROJECTS

REAL TIME ECG MONITORING AND ANALYSIS

Developed an embedded-based real-time ECG monitoring and analysis system using a microcontroller and ECG sensor to continuously acquire, process, and analyze heart signals. Implemented signal conditioning and digital filtering techniques to improve signal quality, calculated heart rate in real time, and detected abnormal cardiac rhythms for early diagnosis. Integrated real-time data visualization.

GAS LEAKAGE DETECTION SYSTEM WITH MULTI-LEVEL ALERT INDICATION

Developed an Arduino and MQ-2 sensor system to monitor and classify real-time gas leakage levels. Engineered automated threshold logic to instantly determine severity-based safety protocols. Integrated hardware peripherals including buzzers and exhaust fans to execute immediate, closed-loop hazard mitigation. Technologies Used: Arduino Uno, MQ-2 Gas Sensor, Arduino IDE, Digital I/O, Threshold-Based Detection, Buzzer Module, Relay Module, DC Exhaust Fan, Real-Time Monitoring, Sensor Interfacing.

COURSES & CERTIFICATION

- Java programming in Leed code
- NPTEL – Introduction to Industry 4.0
- NPTEL – Introduction to Industry IoT

INTERNSHIP

NITROWARE TECHNOLOGIES, COIMBATORE - WEB DEVELOPMENT

Designed responsive web pages using HTML. Developed basic dynamic web applications and gained exposure to frontend-backend integration concepts during the internship. Collaborated with senior developers to debug and optimize web applications. Integrated basic front-end components with backend API. Tested websites across different browsers and devices to ensure compatibility.
