PROJECTS

- **COLLEGE FEES MANAGEMENT SYSTEM:** The College Fees Management System is a web-based application designed to simplify and automate the process of fee collection and management in educational institutions. It allows administrators to manage student fee records, generate fee receipts, track pending payments, and produce financial reports efficiently. Students can view their fee details, pay fees online, and download payment receipts.

- **BLUETOOTH JAMMER:** The Bluetooth Jammer is a device designed to block Bluetooth communication within a specific area. It works by sending interference signals on the 2.4 GHz frequency band, which is commonly used by Bluetooth devices. By doing this, it prevents devices from connecting or transferring data. This jammer can be useful in places like examination halls, offices, or meetings to avoid cheating, data theft, or distractions caused by Bluetooth-enabled gadgets.
