SKILLS

- Python
- DSA
- SQL
- Cloud Computing
- MS Excel

CERTIFICATIONS

- Start Writing Prompts Like a Pro
- Design Thinking – NPTEL
- Problem solving in python - CodeChef
- Advanced SQL – CodeChef
- Introduction to machine learning interface in rehabilitation engineering

AREA OF INTEREST

- AI Applications
- Healthcare Technology
- Product development

LANGUAGES

- English
- Tamil

CO – CURRICULAR ACTIVITIES

- Runner-up in Smart India Hackathon (SIH).
- Overall Championship at Gnanamani College Symposium.
- Joint Secretary Dept. of Biomedical Engineering
- NSS volunteer
- Multiple Symposium Wins

OBJECTIVE

Biomedical Engineering student with a strong interest in software development, AI and data-driven healthcare solutions. Recognized for problem-solving, prototyping and leadership. Seeking opportunities to contribute to technology projects with real-world impact.

EDUCATION

B.E. Biomedical Engineering (Full-time) 2023 – 2027
Sona College of Technology, Salem | Anna University
Current CGPA: 8.4 | 4th year

HSC (12th) 2023
Vetri Vikaas Girls Higher Secondary School | 88%

SSC (10th) 2021
St. Josephs Matriculation.Higher.Secondary.School | 100%

CORE SUBJECT PROFICIENCIES

- Biomedical Instrumentation
- Telemedical system
- Rehabilitation engineering
- Medical Devices Standards and Regulations
- Diagnostic and Therapeutic Equipment

PROJECTS

IT Projects

- **AI-Based Eye Disease Detection:** AI system to detect eye diseases from eye images using image processing and machine learning.
- **AI Skin Lesion Analyzer:** Python-based system for analyzing skin images and classifying risk using image processing and ML.

Core Projects

- **Smart Foldable Aluminium Auxiliary Crutch:** Concept prototype with sensor support to improve patient stability and safety.
- **Dental Scanner:** Conceptualized a smart aligner with embedded sensors for dental health scanning and early cavity detection
- **Knee Track:** To detect osteoarthritis at early stage in north eastern regions and help to monitories and treat it .
