Summary

A dedicated Computer Science and Engineering student with a core focus on Java and Full Stack Development. Characterized by an innovative mindset and a strong drive to contribute to impactful, cutting-edge technological solutions through continuous learning and professional growth.

Education

Kongunadu College of Engineering and Technology (2023 – 2027)
B.E. Computer Science and Engineering (CGPA: 7.80) Tiruchirappalli

Bharathi Higher Secondary School (2022 – 2023)
HSC, Percentage: 86% Namakkal

Bharathi Vidhyalaya Matric Higher Secondary School (2020 - 2021)
SSLC Namakkal

Work Experience

Java Backend Intern Present
Infosys Springboard 7.0

- Working with Core Java, Spring Boot, REST APIs, and MySQL through the Java Developer Internship program.
- Applying object-oriented programming principles and backend development concepts through practical coding assignments.
- Strengthening problem-solving and application development skills using Java and Spring Boot technologies.

Projects

Accident Detection and Emergency Alert System

- Developed a real-time accident detection system using PyTorch, OpenCV, and Python.
- Integrated the trained detection model with a Tkinter application for video processing and accident identification.
- Designed an emergency alert workflow to provide immediate notifications after accident detection.

Face Recognition and Attendance System

- Developed an AI-powered attendance system using FaceNet, PyTorch, Flask, and MongoDB.
- Implemented real-time facial recognition with automated attendance recording and duplicate prevention.
- Built a Flask-based administrator dashboard for attendance management and student analytics.

Skills

Programming Languages	Java, Python, SQL
Frontend	HTML, CSS, JavaScript
Core Concepts	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Achievements

First Prize Artiverse Hackathon – AI-based Accident Detection and Emergency Alert System.
First Prize Paper Presentation – AR Physio 2.0.
