OBJECTIVE

Motivated and dedicated aspiring software engineer seeking an internship to apply strong programming skills and theoretical knowledge in real-world projects. Eager to contribute to innovative solutions, collaborate with experienced professionals, and gain hands-on experience in software development and engineering practices.

EDUCATION

B.E, Electronics and Communication Engineering 2023 – 2027
Kongunadu College of Engineering and Technology, Trichy
CGPA: 7.19

HSC 2022 – 2023
Guru Gnana Sambandar Mission Matriculation Hr. Sec.School, Mayiladuthurai
Percentage: 73%

SSLC 2020 – 2021
Guru Gnana Sambandar Mission Matriculation Hr. Sec.School, Mayiladuthurai
Percentage: 100%

SKILLS

- JAVA
- HTML
- CSS
- CANVA

CERTIFICATIONS

- Java Programming(YellowMatics Certification)
- NPTEL Certification - Industry 4.0
- NPTEL Certification – Introduction to IoT

LANGUAGES

- English
- Tamil
- Japanese

PROJECTS

SMART STREET LIGHT FAULT DETECTION USING EMBEDDED SYSTEM

- Developed a Smart Street Light Fault Detection System using Embedded Systems to automatically identify street light faults and reduce maintenance time. Implemented sensors and a microcontroller for real-time monitoring and efficient fault reporting.
- **TOOLS:** Arduino / Microcontroller, Sensors, Embedded C, IoT Modules

A DEEP LEARNING-BASED EARLY ALZHEIMER'S DISEASE DETECTION USING MRI

- Developed a Convolutional Neural Network (CNN) model using transfer learning to classify Alzheimer's disease stages from MRI brain images. Built a system to classify MRI scans into four stages: Non-Demented, Very Mild, Mild, and Moderate Demented.
- **TOOLS:** Python, TensorFlow / Keras, CNN, OpenCV, Google Colabc

SOFT SKILLS

- Adaptability
- Team Management
- Leadership & Collaboration
- Time Management

INTERSHIPS

Machine Learning Internship 2025

TechVolt Software pvt.Ltd

- Completed Machine Learning internship at Techvolt Software Pvt. Ltd.
- Worked on basic ML concepts and model building.
- Gained hands-on experience in data processing and classification techniques.

ACHIEVEMENTS

- Secured **Third Prize** in Project Expo for developing **Smart Street Light Fault Detection System using Embedded Systems**, recognized for innovation and real-time fault detection.
- Achieved **Second Prize** in Project Expo for **AI-Based Entity Detector ESP32-CAM** Developed to identify and classify objects in real-time.
- Achieved **Second Prize** in Project Presentation for **A Deep Learning-Based Early Alzheimer's Disease Detection Using MRI** appreciated for applying deep learning techniques in healthcare.
