CHEENU D

PCB Design Engineer • Electronics Design Engineer • PCB Layout Engineer

cheenu26012005@gmail.com | +91 77083 50437 | Kallakurichi, Tamil Nadu | linkedin.com/in/cheenu-d-81b28625b

Professional Summary

Fresher Electronics Engineer with strong fundamentals in **PCB design, schematic capture, circuit design, and electronics hardware development**. Hands-on academic experience using **KiCad and Altium Designer** for schematic and PCB design workflows, including circuit schematics developed through college projects. Familiar with PCB layout, component placement, routing, design-rule concepts, Gerber generation, and hardware debugging. Seeking an entry-level **PCB Design Engineer** role.

Education

B.E. Medical Electronics Engineering *2022–2026*
Saveetha Engineering College, Chennai **CGPA: 7.9/10**
Minor: 3D Printing Technology

HSC – 68.5% *2021–2022*
Government Model Hr. Sec. School, Sithal

SSLC – 74.5% *2019–2020*
Government Model Hr. Sec. School, Sithal

PCB Design Experience

- Created and worked with **electronic circuit schematics** as part of college projects, translating circuit requirements into practical hardware designs.
- Hands-on experience with **KiCad** for schematic capture, footprint assignment, PCB layout, component placement, routing, and Gerber preparation.
- Hands-on academic/course experience with **Altium Designer**; completed an Altium PCB Design course.
- Familiar with PCB design workflow, design-rule concepts, signal paths, component interconnections, and basic hardware debugging.

Projects

Real-Time ECG Monitoring System

- Designed an electronic monitoring system using **Arduino Uno and AD8232**.
- Created and tested circuit schematics for signal acquisition and sensor interfacing.
- Worked on signal conditioning, filtering, waveform visualization, circuit testing, and troubleshooting.

Hybrid Photo Biomodulation and PEMF Therapy System

- Developed an ESP32-based electronic system integrating LED and coil-driver circuits.
- Designed control and driver circuits using **MOSFET switching, PWM control, LCD interface, and temperature-based safety cutoff**.
- Worked on circuit connections, component selection, testing, debugging, and technical documentation.

Technical Skills

PCB Design: KiCad, Altium Designer, Schematic Capture, PCB Layout, Component Placement, Routing, Gerber Files
Circuit Design: Analog/Digital Circuits, Sensor Interfaces, MOSFET Switching, LED Drivers, Power Supply Basics
Embedded: Arduino Uno, ESP32, Embedded C, PWM Control **EDA/Simulation:** Proteus, LTspice, MATLAB, Simulink
Testing: Digital Multimeter, Oscilloscope (Basic), DC Power Supply, Circuit Debugging
Core: Hardware Troubleshooting, Technical Documentation, Problem Solving, Team Collaboration

Experience

In-Plant Training – Saveetha Medical College *Jan 2024*

- Completed 15-day technical training involving electronic equipment, measurement, preventive maintenance, and troubleshooting workflows.

Certifications & Achievements

- **Altium PCB Design Course** – Completed
- **MATLAB Onramp** – MathWorks • **Infosys Springboard IoT Course** – Completed
- **Lead Coordinator** – Bio Nexus Symposium, Saveetha Engineering College
- **Third Prize** – Poster Presentation, Vitalize Biomedical Symposium, Rajalakshmi Engineering College
