RANJITHPRABHU K

ranjithprabhukjrv@gmail.com 6381199191 Sankari, Salem dt, Tamilnadu 637301

Objective

Mechanical Engineer with 1 year of experience in equipment maintenance and troubleshooting. Skilled in ensuring machine reliability and reducing downtime. Seeking to apply technical knowledge and problem-solving skills in a challenging maintenance engineering role.

Education

B.E Mechanical Engineering 2023 – 2026
Sengunthar Engineering College,Tiruchengode
• CGPA: [8.64/10]

Secondary School 2014 – 2015
Govt,boys HigherSecondary School, Sankagiri
Percentage:60

Diploma Mechanical Engineering 2015 – 2018
K.S.R Polytechnic College,Tiruchengode
Percentage:75%

Work Experience

TV Sundram Iyengar & Sons Private Limited 01/07/2019 –30/06/2020
1 year work experience Sankagiri

Skills

- MS office
- AUTO CAD
- Solid Works

Languages

Tamil English

Certifications

- Essential of English Communication -Times Pro
- Basics of Wealth Management -TCS
- MATLAB Course
- Honours Diploma in Computer Application
- Basics of Operation Procurement in Supply Chain Management -TCS

Projects/Experience

Distance measurement and pneumatic braking system
Diploma Project
The Distance Measurement and Pneumatic Braking System is an automated safety mechanism designed for vehicles to prevent collisions. It uses sensors to detect the distance between the host vehicle and an obstacle (or another vehicle) in front. Based on this data, the system automatically activates the pneumatic braking mechanism if the distance falls below a safe threshold.

Design and Fabrication of Shaper Machine
College Mini Project
A shaper machine is a machine tool used for producing flat surfaces, grooves, and slots on workpieces by means of a single-point cutting tool that moves linearly. The Design and Fabrication of a Shaper Machine project focuses on developing a cost-effective, manually or semi-automatically operated machine suitable for small-scale workshops, training institutes, and prototype manufacturing.

IoT-Based Industrial Boiler Monitoring and Control System
College Main Project
IoT-Based Industrial Boiler Monitoring and Control System College Main Project An IoT-Based Industrial Boiler Monitoring and Control System is designed to improve the safety, efficiency, and automation of boiler operations in industries. Boilers are critical equipment used for generating steam or heat, and improper monitoring can lead to energy loss, equipment damage, or even accidents. This project uses IoT technology to continuously monitor important parameters and control the system remotely.

Area Of Interest

Manufacturing Process | Trouble Shooting

Soft Skill

- Problem Solving
- Team Work
- Time Management

PERSONAL PROFILE

NAME :	K.Ranjithprabhu
FATHER NAME:	R.Kandasamy
MOTHER NAME:	K.Janaki
MARTIAL STATUS:	Single
GENDER:	Male
NATIONALITY :	Indian
