SUBASH SUBRAMANI

ASPIRING NETWORK ENGINEER | CYBERSECURITY & SOFTWARE ENTHUSIAST

sssmsubash@gmail.com | +91 8668698930 | Chennai, India | linkedin.com/in/subash-subramani-1982a271

PROFESSIONAL SUMMARY

Recent Computer Science and Engineering (Cyber Security) fresher with zero professional work experience, seeking entry-level opportunities as a Network Engineer, Security Analyst, Cybersecurity Intern, Penetration Tester, or Software Developer. Strong academic foundation and hands-on project experience in networking fundamentals, routing & switching, fuzzy logic modeling, and Python-based security tool development. Certified in CCNA and CompTIA Security+.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering (Cyber Security) Oct 2022 – May 2026

Dhanalakshmi College of Engineering, Tambaram

Specialization: Network Security, Ethical Hacking, Cryptography & Algorithm Design

Higher Secondary Education Jun 2021 – Apr 2022

Government Higher Secondary School, Erayamangalam, Namakkal

Science stream with focus on Mathematics, Physics, and Computer Science

PROJECTS

Fuzzy Weighted Ensemble-Based URL Phishing Detection System (Final Year Project) Python, Flask, Fuzzy Logic

GitHub: github.com/Buvanesh-01/PHISH-IMMUNE-Fuzzy-Algorithm

- Developed a two-tier URL phishing detection architecture extracting 22 lexical, host, and security features (DNS, WHOIS, SSL) to classify URLs into Legitimate, Suspicious, or Phishing.
- Integrated multi-model machine learning classifiers (Random Forest, XGBoost, and SVM) achieving strong test-set accuracy and ROC-AUC.
- Designed a rule-based fuzzy logic dynamic weighting engine in Python to evaluate contextual indicators (domain age, SSL validity, IP usage) and combine model probabilities.
- Built a Flask-based web application with API endpoints and an interactive console UI for real-time security analysis and reporting.

Network Security Monitor Python, Scapy, Tkinter, SQLite

- Developed a Python-based desktop tool for real-time network traffic analysis, packet capturing, and automated logging.
- Implemented suspicious activity detection rules and alert mechanisms to track network anomalies.
- Added packet inspection and reporting capabilities to assist in network troubleshooting and threat monitoring.

TECHNICAL SKILLS

Networking & Infrastructure: TCP/IP, IPv4/IPv6 addressing & subnetting, Routing & Switching concepts, VLANs, LAN/WAN, network troubleshooting, traffic analysis, DNS/WHOIS analysis.

Cybersecurity & Analysis: Ethical Hacking, Penetration Testing, Threat Analysis, Wireshark, Nmap, Burp Suite, Network Monitoring, SSL/Security Analysis.

Programming & Software Development: Python, Java, C, Flask, Algorithm Design, Object-Oriented Programming, Data Processing (Pandas, NumPy).

Tools & Platforms: Kali Linux, VirtualBox, Git/GitHub, Scikit-Learn, XGBoost, Joblib, Network Security Monitor.

CERTIFICATIONS

- **CCNA Training** – Completed (Networking, Routing, Switching & IP Connectivity)
- **CompTIA Security+** (Oct 2023; no expiration listed)
- **Introduction to Ethical Hacking** – Cybersecurity Institute
- **Front End Development (HTML)** – Web Development Academy
- **Cybersecurity Workshop Level 2** – The Technique Academy
- **Cyber Security with CTF Challenge Workshop** – Security Training Center
- **Advanced Techno Workshop Series 25 Level 3** – Techobytes Technologies & CHES, IIT Madras

ADDITIONAL INFORMATION

Professional Skills: Time Management, Leadership, Communication, Problem Solving, Team Collaboration, Critical Thinking, Adaptability

Languages: Tamil (Native), English (Fluent)
