ABOUT ME

Aspiring Software Engineer and AI Enthusiast currently pursuing B.Tech in Artificial Intelligence and Data Science. Passionate about solving real-world problems through AI and machine learning, with hands-on experience from internships, projects, and certifications. Eager to learn, innovate, and contribute to impactful technology-driven solutions.

EDUCATION

B.Tech Artificial Intelligence and Data Science,
KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY
8.4 CGPA
2023 – 2027

HSC, SRM PUBLIC SCHOOL
70.4%
2022 – 2023

SSLC, SRM PUBLIC SCHOOL
88.4%
2020 – 2021

PROJECTS

Edumate AI, Technologies: Python, Generative AI, Agentic AI, Streamlit, RAG, LLM

- Developed an AI-powered student assistant for personalized academic guidance and learning support.
- Generates customized learning roadmaps and productivity recommendations using Generative AI.

Credit Card Approval Prediction, Technologies: Python, Streamlit, Logistic Regression

- Developed a machine learning model to predict credit card approval decisions using applicant data.
- Enables faster, accurate, and data-driven approval prediction through automated classification.

SKILL

- Java
- Python
- Generative AI
- Artificial Intelligence
- Machine Learning
- Computer Vision
- SQL

AREA OF INTEREST

- Artificial Intelligence
- Generative AI
- Data Analytics
- Machine Learning
- Prompt Engineering

CERTIFICATIONS

NPTEL
Internet of Things

NPTEL
Cloud Computing

Generative AI & Agentic AI Training
DigiDARA Technologies Pvt. Ltd.

NPTEL
Artificial Intelligence: Knowledge Representation and Reasoning

AI Virtual Internship
Infosys Springboard

INTERNSHIP

Generative AI Intern, DigiDARA Technologies Pvt. Ltd

- Built AI-powered applications using Python, LLMs, RAG, Generative AI, and Agentic AI.
- Developed EduMate AI, an intelligent student assistant for academic guidance, personalized learning, and productivity support.

AI & Cybersecurity Intern, National Institute of Technology, Tiruchirappalli

- Developed an AI-based phishing detection system using graph analysis on Ethereum and Hyperledger blockchain networks.
- Applied machine learning techniques to analyze transaction patterns and identify phishing accounts for improved blockchain security.

ACHIEVEMENTS

First Prize: 24-Hour Hackathon, Kongunadu College of Engineering and Technology

Second Prize & Best Performer: 24-Hour Hackathon, Kongunadu College of Engineering and Technology

First Prize - Paper Presentation: Kongu Engineering College

First Prize - Paper Presentation: Science and Humanities Department

Second Prize - Paper Presentation: KSR College of Engineering

Top 52 out of 650 Teams : One Day Ideathon, NIT Trichy

Silver Certification- NPTEL: Introduction to Internet of Things

HACKATHON EXPERIENCE

24-Hour Hackathon, Kongunadu College of Engineering and Technology
- Developed a CNN-based model for non-invasive anemia detection using eye conjunctiva images.

24-Hour Hackathon, Kongunadu College of Engineering and Technology
- Developed an AI-based complaint analysis system with automated department routing.

36-Hour Hackathon, Sri Manakula Vinayagar Engineering College
- Developed an AI-powered cyber threat detection system using security logs and incident reports.

TRAINING AND WORKSHOPS

Java Programming
- Collaborated on innovation and entrepreneurship challenges

Machine Learning with AI Applications
- Completed a 6-day training in Machine Learning with AI Applications and developed multiple machine learning projects.

Object-Oriented Programming (OOP) Training
- Gained hands-on experience in OOP concepts through a 6-day training program.

CO–CURRICULAR ACTIVITIES

- Participated in hackathons, paper presentations, and technical workshops.
- Actively involved in group discussions, seminars, and technical events.
- Developed AI and Machine Learning projects through internships and practical training.
- Continuously enhancing technical skills in AI, Machine Learning, and Generative AI.

EXTRACURRICULAR ACTIVITIES

- Storytelling
- Cricket
- Socializing
- Nature Photography
- Movie Enthusiast
