CAREER OBJECTIVE

Computer Science engineer skilled in Java, frontend technologies, and web development, with internship experience. Eager to build impactful solutions and grow in a forward thinking organization.

EDUCATION

2023 - 2027 BE - Computer Science Engineering	**KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY** CGPA – 7.86
2022- 2023 (HSC)	**GREEN PARK MATRIC HIGHER SECONDARY SCHOOL** Percent - 85
2020 - 2021 (SSLC)	**GREEN PARK MATRIC HIGHER SECONDARY SCHOOL** Percent - Pass

INTERNSHIP

COMPANY: ILife Technology

DURATION: June 2025 to July 2025.

Domain: Web Development

- Built responsive web pages using HTML, CSS, JavaScript.
- Gained hands-on experience in frontend-backend integration and database operations using MySQL.

COMPANY: ViWise Tech Softwares

DURATION: November 2025 to December 2025.

Domain: Artificial Intelligence and Machine Learning

- Developed foundational AI/ML skills using Python and popular ML libraries.
- Worked on data analysis, preprocessing, visualization, and machine learning workflows.

TECHNICAL SKILLS

- **Web Technologies** : HTML, CSS, JavaScript.
- **Programming** : Java.
- **Core Concepts** : Object Oriented Programming, Data Structures, DBMS.
- **Database** : MySQL.
- **Tools & IDE** : VS Code, Eclipse IDE.

SOFT-SKILLS

- Adaptability.
- Teamwork.
- Problem-Solving.
- Effective communication.
- Time Management.
- Quick Learner.

PROJECTS

Advanced Energy Monitoring System

- **Role: Frontend Developer**
- Designed and developed to identify the energy consumption of each device in real time and detects abnormal energy usage.
- **Tools and Technology:** Arduino IDE, Arduino Uno, Current Sensor, LCD Display, Stepdown Transformer, Rectifier, Embedded C++, HTML, CSS, JavaScript, MongoDB, VS Code.

Food Court Management System

- **Role: Frontend Developer**
- Designed and developed a system to manage food orders, menu items, and billing processes efficiently.
- **Tools and Technology:** HTML, CSS, MongoDB, Python, Flask, VS Code.

ACHIEVEMENTS

- **Hack@train** **: Mock Interview Chatbot**
  Built an AI-powered Mock Interview Chatbot using NLP to simulate interview Q&A (Won 1st Prize).
- **Hackathon** **: Collaborative Code Editor.**
  Developed a real-time Collaborative Code Editor enabling multi-user code sharing (Won 2nd Prize).
- **Hackathon** **: Advanced Energy Monitoring System.**
  Developed a device to identify the real time energy consumption of each device (10000 Cash Prize).

CERTIFICATIONS

- **Core Java** -Value added Course.
- **Data Analytics with Python** -NPTEL.
- **Software Testing** - NPTEL.
- **Prompt Engineering** - Infosys Spring Board.
