PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student with basic knowledge of programming and web development. Hardworking, adaptable, and eager to start a career in software development while continuously improving technical and problem-solving skills.

EDUCATION

B.E. Computer Science and Engineering 2023 – 2027

Kongunadu College of Engineering | CGPA: 8.2

HSC (12th Standard) 2023

Sowdambikaa Matriculation Higher Secondary School, Thottiyam | 83.5%

SSLC (10th Standard) 2021

Sowdambikaa Matriculation Higher Secondary School, Thottiyam | 100%

TECHNICAL SKILLS

- Programming Languages: Java
- Web Technologies: HTML, CSS, JavaScript
- Database: MySQL, MongoDB
- Tools & Platforms: VS Code, GitHub, Git, Claude

PROJECTS

AI Acoustic Fall Detection | *Python, Machine Learning, Signal Processing*

AI-powered safety system that detects human falls in real time by analyzing acoustic signal patterns, built to help caregivers and families respond faster to falls among elderly or at-risk individuals.

- *Collected and preprocessed real-time acoustic signal data, applying noise filtering and feature extraction to prepare clean input for model training.*
- *Built and trained a machine learning model to reliably distinguish fall events from everyday household sounds, improving detection accuracy over rule-based approaches.*
- *Evaluated the model against varied real-world sound scenarios to reduce false positives and ensure consistent real-time performance.*
- *Findings and results from this project were published as a research journal paper, documenting the methodology and detection outcomes.*

AI-Based Deforestation Detection using Satellite Imagery | *Team Project, Machine Learning, Remote Sensing*

Collaborative team project using satellite imagery analysis to identify and track deforestation trends across selected regions, aimed at supporting environmental monitoring efforts.

- *Worked with the team to analyze satellite imagery datasets and identify patterns indicating vegetation loss over time.*
- *Contributed to presentation design and logic monitoring, helping communicate the model's findings clearly to a non-technical audience.*
- *Supported testing and validation of the detection logic to help ensure the model's outputs aligned with observed imagery trends.*

CERTIFICATIONS & COURSES

- Typewriting (English) Junior Grade certification with distinction
- Value-added courses in Django and Java basics
- Participated in various technical seminars and workshops
- Completed internship in fullstack development

SOFT SKILLS & AREAS OF INTEREST

Soft Skills: Communication, Teamwork, Problem Solving, Adaptability, Time Management, Leadership

Areas of Interest: Software development, Web application development, Front-end development

EXTRA CURRICULAR ACTIVITIES

- Actively participate in college events such as annual day
- Involved in presentations and group discussions
- Engage in self-development activities
- Involved in leadership activities as Class Representative
- Attend various seminars on emerging topics
