SOBIKASRI S

ELECTRONICS AND COMMUNICATION ENGINEERING

sobikasrisanjeevi123@gmail.com | +91 8300302335 | LinkedIn

OBJECTIVE

To work in an environment which encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately.

TECHNICAL SKILLS

- Java
- Embedded System
- IOT

SOFT SKILLS

- Teamwork
- Time Management

INTERNSHIP

Ashtonish Infotech PVT LTD
Trichy
Completed a Full Stack Development internship at Astonish Infotech, Trichy, with hands-on experience in HTML, CSS, and frontend-backend integration.

Taras system and sollution
Bengaluru
Completed an internship in Advanced Embedded Systems for Industrial Automation, gaining hands-on experience in embedded technologies, microcontroller programming, and industrial automation concepts.

EDUCATION

Kongunadu College Of Engineering And Technology **2023-2027**
Upto 6th Semester - 8.73

- B.E. Electronics And Communication Engineering

Our Lady Of Lourde's Girls Higher Secondary School **2022-2023**
XII - 76%

Our Lady Of Lourde's Girls Higher Secondary School **2020-2021**
X - 100%

CERTIFICATIONS / VALUE ADDED COURSE

- CoreJava – Value Added Course conducted by Yellomatics in college.
- Embedded System – Completed value added course and learned fundamentals of microcontroller programming.

PROJECTS

Title:Smart Embedded Safety Device For Women

Description: Developed a portable women's safety device using ESP8266, GPS, GSM, a push button, and a buzzer. Sends the user's live location via SMS to pre-registered emergency contacts during emergencies. Activates a buzzer to alert nearby people for immediate assistance. Designed as a compact embedded prototype with future IoT integration support.

Title: Advanced Adaptive Methods for Noise Reduction in Biomedical Signal Processing

Description: Developed a wavelet-based biomedical signal denoising system for ECG, EEG, and EMG signals. Implemented adaptive thresholding to remove noise while preserving critical signal features. Validated performance using signal quality metrics for accurate analysis.

Title: Smart Agriculture Monitoring System using STM32

Description: Developed an STM32-based IoT smart agriculture monitoring system for real-time field monitoring. Integrated sensors to measure soil moisture, temperature, humidity, rainfall, and water level. Enabled remote monitoring through a Web dashboard using Wi-Fi. Improved crop management by reducing water usage and manual effort.

CO-CURRICULAR ACTIVITIES

- NPTEL Certified – Internet of Things (IoT)
- Participated in Smart India Hackathon (SIH)

EXTRA-CURRICULAR ACTIVITIES

- Event Volunteer in college programs
- Participated in sports activities

HOBBIES

- Drawing
- Solving Sudoku
