PROFILE

Desire a workplace that encourages success and professional development, where I can leverage my Electronics and Communication Engineering skills in Embedded System, PCB Design, C Programming and Java to effectively meet organizational objectives.

EDUCATION

Bachelor of Engineering (Electronics and Communication Engineering)
2023-2027
Kongunadu College of Engineering and Technology
CGPA: **7.6**

Higher Secondary Certificate (HSC) 2023

S.B.V Matriculation Higher Secondary School
Percentage: **70%**

Secondary School Leaving Certificate (SSLC) 2021
S.B.V Matriculation Higher Secondary School
Percentage: **100%**

TECHNICAL SKILLS

- C programming
- Java programming
- Embedded System
- PCB Design
- Internet of Things

SOFT SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

PROJECTS

IoT Intravenous Fluid Monitoring and Alerting System

- Uses load cells and the system uses load cells and IoT sensors to continuously track IV fluid levels and sends automatic alerts to nurses when a bag is low or flow is interrupted. It helps prevent missed refills, reduces manual monitoring, and improves patient safety in hospitals
- **Tools:** ESP 8266 , IV Bag , Load Cell Buzzer, LCD display , HX711 . I2C module.

Smart Waste-to-Energy and E-Waste Safety System

- Uses IoT sensors and real-time monitoring to manage waste efficiently, convert waste into usable energy, and ensure safe handling of electronic waste.
- **Tools:** Arduino UNO, Node MCU ESP8266, MQ-4 Gas Sensor, DHT11 Sensor, Load Cell with HX711, BMP180 Pressure Sensor, Moisture Sensor, 16×2 LCD with I2C

INTERNSHIP (JUNE 2025)

- Embedded project activities -Speculation Info Tech, Trichy
- VIWISE tech software (Front end web development), Trichy

CERTIFICATIONS

- Java Programming – yellow matics
- Embedded System – Taras System and Solutions
- NPTEL (Elite) – Introduction to Industry 4.0 & Internet of Things

ACHIEVEMENTS

- Secured **Top 500 State-Level** position in **NIRAL THIRUVIZHA 3.0** and won a **₹15,000 cash prize** for developing an **IoT-based Smart Waste-to-Energy and E-Waste Safety System** with real-time monitoring and automation.
- Led an industry-oriented workshop on FPGA design and Edge AI acceleration for embedded image processing and IoT applications.
- Developed an ESP32-based portable fire detection and automated suppression system during a hackathon.

CURRICULAR ACTIVITIES

- Participated in workshops on FPGA Design, Edge AI Acceleration, Embedded Image Processing and IoT Applications.
- Presented technical papers related to VLSI and IoT technologies.
- Actively participated in hackathons and project development activities.

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge and belief.
