DEEPAKKUMAR S

Computer Science Graduate | Python, SQL, REST APIs, Machine Learning & Generative AI

+91 9080947678 | dsdeepakkumars72@gmail.com | Chennai, Tamil Nadu, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Adaptable and analytical Computer Science (Data Science) graduate with a CGPA of 8.72, building a strong foundation in backend systems, REST API development, and relational databases. Skilled in applying AI and data-driven techniques from natural language processing to time-series forecasting - to solve practical engineering problems, with a consistent focus on clean architecture, software reliability, and local data privacy. Quick to pick up new tools and frameworks, with strong analytical thinking and a collaborative, detail-oriented approach to delivering dependable software solutions.

TECHNICAL SKILLS

Languages & Development: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, REST APIs, OOP Concepts

Databases & Backend: MySQL, SQLite, Relational DBMS Concepts, CRUD API Design

AI & Machine Learning: NLP Basics, Scikit-learn, Time-Series Forecasting (ARIMA, SARIMAX, Prophet, LSTM), Generative AI Tools (Gemini, Claude)

Data Analytics: Data Cleaning, Data Visualization, ETL Concepts

Tools & Practices: Git, GitHub, Tableau, Power BI, Excel, Jupyter Notebook Agile Basics, Debugging

PROJECT EXPERIENCE

MILO — Offline AI Personal Assistant | *Python, Whisper STT, SQLite, NLP*

- Built an offline NLP voice assistant using Python, Whisper STT, and SQLite to automate scheduling, reminders, and expense logging without any cloud dependency.
- Designed the entire pipeline to run and store data fully on-device, achieving 100% local data privacy and zero reliance on cloud services.

Event Management API System | *Node.js, TypeScript, Express, SQLite*

- Built a RESTful backend using Node.js, TypeScript, Express, and SQLite with query-optimized schemas, supporting full CRUD operations.
- Tested and documented all API endpoints using Swagger, ensuring reliable and well-defined request/response contracts.
- Used Gemini (Generative AI) to accelerate code architecture design and debugging during development.

Stock Price Prediction System | *Python, ARIMA, SARIMAX, Prophet, LSTM, Scikit-learn*

- Developed a machine learning time-series pipeline benchmarking ARIMA, SARIMAX, Prophet, and LSTM models using Scikit-learn, Pandas, and NumPy.
- Achieved an 18% lower RMSE with the LSTM model compared to baseline approaches, improving forecast accuracy.

EDUCATION

B.E. Computer Science Engineering (Data Science), Annamalai University (2022–2026) - CGPA: 8.72

12th Standard, Govt. Higher Secondary School (2021) - 85%

10th Standard (2019) - 76%

CERTIFICATIONS & WORKSHOPS

- Python (Basic) & SQL (Basic) - HackerRank, 2026
- Basics of Python - Infosys Springboard, 2026
- Critical Thinking in the AI Era - HP LIFE, 2026
- Employability Enhancement Training - E-Square (Machine Learning, DBMS, Cloud Concepts, R)
- Git & GitHub Workshop - Version Control & Team Collaboration Workflows
- Event Organizer, COMPSEM Poster Designing Event - Coordinated cross-team logistics

LANGUAGES

English, Tamil
