PROFILE

Aspiring Java Developer with a strong foundation in object-oriented programming and full-stack web development. Hands-on experience building backend logic in Java, working with SQL databases, and developing frontend interfaces using HTML, CSS, and React. Quick learner, self-motivated, and eager to contribute to real-world Java-based software projects.

EDUCATION

B.Tech — Information Technology – CGPA – 7.92 *2023 – 2027*
Kongunadu College of Engineering and Technology, Trichy

Higher Secondary (12th Standard) – 83% *2022 – 2023*
Government Higher Secondary School, Vengampatty

Secondary School (10th Standard) *2020 – 2021*
Government Higher Secondary School, Vengampatty

TECHNICAL SKILLS

Programming Languages: Java, Python
Web Technologies: HTML, CSS, JavaScript
Database: MySQL,MongoDB
Operating Systems: Windows, Kali Linux
Networking & Security: TCP/IP, DNS, HTTP, OSI Model, Ethical Hacking

SOFT SKILLS

- Adaptability to New Environments • Quick Learner • Team Collaboration

INTERNSHIP

Full Stack Development Intern — E-Soft IT Solutions
Trichy

- Gained hands-on experience in full-stack web application development.
- Developed backend logic using Java and Python, applying core programming concepts.
- Built responsive frontend interfaces using HTML, CSS, JavaScript, and React.
- Worked with SQL databases and collaborated in real-time development workflows.

PROJECTS

AI Framework for Generating Videos from Natural Language Text
AI-based Text-to-Video Generation System using Natural Language Processing

- Developed a system to automatically generate videos from natural language text input.
- Applied AI and NLP concepts to parse and interpret input text.
- Converted processed text into relevant video scenes, reducing manual video-creation effort.

Generating Electricity from Human Footsteps
A Piezoelectric-Based Renewable Energy System for Smart Public Infrastructure

- Designed a system converting kinetic energy from human footsteps into usable electricity.
- Used piezoelectric sensors placed under a footstep platform to capture mechanical energy.
- Stored generated electricity in batteries/capacitors to power small devices like LEDs and mobile chargers.

CERTIFICATIONS

- Core Java Certification — Yellowmatics.ai, Kongunadu College of Engineering and Technology
- Advanced Cyber Security Certification — Hackup Technology
- Introduction to Internet of Things (IoT) Certification — NPTEL
- Introduction to Machine Learning Certification — NPTEL

LANGUAGES

Tamil, English, Japanese (N5)
