GK Road , Dharmapuri, Tamil Nadu

EDUCATION

B.E. - Electronics and communication Engineering Salem College Of Engineering And Technology, Anna University 2026 | Salem, Tamil Nadu
CGPA: 7.8

HSC
Bharath Hi-tech Matric.Hr.Sec.school
2022 | GK.Road, Tamil Nadu
Percentage: 78.5%

SSLC
Bharath Hi-Tech Matric.Hr.Sec.School
2020 | GK.Road, Tamil Nadu
Percentage: 97%

SKILLS

Program Languages
Python, Embedded C, C-Program, AIML

Soft Skills
Problem Solving, Communication and Teamwork, Adaptability

Tools
VS Code, Arduino ide, Ltspice

Language
English, Tamil

AI Tools
ChatGPT, Gemini, Claude

Core Skill
IoT fundamentals, Microcontrollers, Circuit design, VLSI fundamentals

SUMMARY

Motivated Electronics and Communication Engineering graduate from Anna University with a strong interest in software development, embedded systems, IoT, and AI/ML. A quick learner with strong problem-solving, teamwork, and communication skills, eager to contribute to innovative projects while continuously expanding my technical knowledge and growing as an engineer.

INTERNSHIP

Imagecon India private Limited
Machine Learning Intern
09/2023 – 10/2023 | Salem, Tamil Nadu

- Developed a machine learning model for car mileage prediction using Multiple Linear Regression.
- Evaluated model performance and interpreted prediction results.
- Strengthened knowledge of machine learning workflow and predictive analytics.

MikroSun Technology
Artificial Intelligence Intern
06/2025 – 07/2025 | Salem, Tamil Nadu

- Learned the fundamentals of Artificial Intelligence. Worked with machine learning concepts
- Improved analytical, problem-solving, and technical skills.
- Successfully completed hands-on internship training with satisfactory performance.

PROJECTS

Car Mileage Prediction using Multiple Linear Regression
Developed a machine learning model to predict car mileage using Multiple Linear Regression. Collected, cleaned, and preprocessed vehicle datasets for accurate analysis. Performed feature selection using factors such as engine size, horsepower, and vehicle weight.

Smart Lock System
Implemented RFID-based authentication to allow access only to authorised users. Programmed the ESP32 microcontroller using the Arduino IDE with Embedded C.Gained hands-on experience with ESP32, RFID technology, Arduino programming, and embedded systems.

Mechatronics Integrated IoT Fire Fighting Robot
Developed an autonomous IoT-based fire-fighting robot using ESP32, flame sensor, MQ135 gas sensor, GSM module, water pump, and humidifier for real-time fire detection and suppression. Integrated ThingSpeak IoT cloud for remote monitoring and validated the prototype under controlled fire conditions, achieving reliable sensor performance and stable system operation
