PROFESSIONAL SUMMARY

Motivated Information Technology student with knowledge of Core Java, cloud computing, and full stack development. Hands-on experience through a cloud computing internship and active participation in hackathons and technical events, including winning 1st prize in an AI DS hackathon and 3rd prize in an DSU UNIVERSITY hackathon. Quick learner with strong problem-solving and teamwork skills, eager to apply technical knowledge in a professional environment.

PROFESSIONAL SUMMARY

To obtain a challenging role in software development where I can utilize my programming and problem-solving skills to develop practical and scalable solutions.

EDUCATION

Kongunadu College of Engineering and Technology 2023–Present
Bachelor of Engineering (information technology) *Karur, India*

Karur Sarasvathi Vidhyalaya Higher Secondary School 2021–2023
Higher Secondary Education (Class XII); ***Percentage: 71.67%*** *(430/600)* *Karur, India*

Karur Sarasvathi Vidhyalaya Higher Secondary School 2021
Secondary School Education (Class X); All Pass (Corona Batch) *Karur, India*

SKILLS SUMMARY

Programming: Core Java, Computer Programming Fundamentals
Technologies: Cloud Computing, Full Stack Development, Prompt Engineering
Soft Skills: Problem Solving, Team Collaboration, Quick Learner, Hackathon Participant

EXPERIENCE

Appin Technology June 2025
Cloud Computing Intern *Coimbatore, India*

- Gained practical exposure to cloud computing concepts, architectures, and services during a 2-week internship.
- Collaborated with mentors to understand cloud deployment models and performed hands-on exercises.

CERTIFICATIONS

Advanced Diploma in Computer Programming – SSS Computers, Karur (6 Months)
Value Added Course – Core Java (VACAD03) – Kongunadu College of Engineering and Technology (Sep 2024)
Computer Training Program – Kongunadu College of Engineering and Technology (Apr 2023)

Frontend web development – Infosys Springboard, (June 4 2025)

ACHIEVEMENTS & ACTIVITIES

- **1st Prize – AI & DS Department Hackathon** – Kongunadu College of Engineering and Technology (Feb 2026)
- **3rd Prize – Hackathon** in **Computer Science and engineeing** – Dhanalakshmi Srinivasan University (march 11 2026)
- **2nd Prize – Paper Presentation** – Gnanamani College of Engineering and Technology (Oct 2024)
- **1st Prize – General Quiz** – JJ College of Engineering and Technology (Apr 2024)
- **1st Prize – Technical Connection** – JJ College of Engineering and Technology (Apr 2024)
- **Participated in Hackathons:** IT Dept Hackathon (Mar 2024), CSE Dept Hackathon (Feb 2026), St. Joseph's Institute of Technology (Jan 2025)

- **Participated in Paper Presentations:** Dhanalakshmi Srinivasan University, JJ College of Engineering and Technology (Apr 2024)
- **Industrial Visits:** Techvolt Software Pvt Ltd (Full Stack Development, Jan 2025), Accent Techno Soft (Prompt Engineering, Jan 2026)
- **Shortlisted** in **SIH2026**
- **Completed 150+ problems in leedcode**

Project details

1. AI-Based Forest Fire Risk Prediction & Alert System
Description:

- Created an AI-based system for predicting the risk of forest fires based on satellite images, weather, vegetation , and historical data.
- Data Preprocessing, Feature Engineering, and Machine Learning-Based Risk Prediction Performed.
- Developed an Interactive Heat Map to Visualize High-Risk Forest Fire Locations Geographically.

2. AI-Based Mental Health Chatbot (Mini Project)
Description:

- Developed an intelligent chatbot that can identify emotions of users using sentiment analysis techniques.
- Trained basic ML/NLP algorithms for user mood detection and responded with encouraging messages.
- Developed a conversation flow that can simulate human-like empathetic conversations with users.
- Focused on a real-world application: early mental health awareness and support system.
- Developed a simple user interface/chatbot interface (web).

3. Touch & Tell - Voice Assistance for Immobile Patients
Description:

- Created a touch-based system for immobile patients to communicate through voice output.
- Integrated Text to Speech for immediate vocal responses.
- Created an interface that is simple and easy to use.

4. Invitation Robot for Department Events
Description:

- Designed a robot to provide automated voice invitations for events happening within the department.
- Pre-defined messages were programmed, enabling interactive engagement.
- Developed using [Arduino / Embedded system / sensors / motors].

Extra details

CORE SUBJECT KNOWLEDGE	DBMS,DSA,Os and computer networking
TOOLS SECTION	VS code,github,git, Eclipse,Arduino IDE
POSITION OF RESPONSIBILITY	Event organizer, Team lead in hackathon
Membership	CSI membership
Languages	Tamil and English

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
