Vishnu Raj

RPA | Blue Prism

Phone: +91 9787696750 | Email: vishnuraaj30@gmail.com

Summary

RPA Developer with 3+ years of experience designing, developing, and deploying Blue Prism automation solutions for enterprise clients. Delivered automations for web portal data extraction, email-triggered workflows, SharePoint file handling, and service request creation, reducing manual labour time by 30% and operational errors by 25%. Skilled in Control Room management, work queues, Credential Manager, exception handling, multi-bot architecture, and live-process support. Additional training in Core Java, AWS, DevOps, and Selenium test automation.

Skills

RPA and Automation: Blue Prism, Process Studio, Object Studio, Work Queues, Credential Manager, Session Variables, Multi-Bot Architecture, Web Automation, Email Automation, Data Extraction, ETL, Exception Handling, Debugging, Troubleshooting

Control Room and Support: Control Room Management, Scheduler Maintenance, Process Monitoring, Change Requests (CR), Defect Resolution, SLA Management, Client Governance Calls

Programming and Testing: Core Java, Selenium, Manual Testing

Cloud and DevOps: AWS, DevOps

Tools and Integration: SharePoint, Virtual Machines, Email-Triggered Workflows

Professional: Requirements Gathering, Business Process Optimization, Data Analysis, Performance Reporting, Stakeholder Collaboration, Team Leadership, Knowledge Sharing

Experience

Software Engineer (RPA Blue Prism Developer) | iOPEX Technologies | Sep 2021 – Jan 2025

Project: Automated System Access (UAM) for BT Client

- Designed, developed, and deployed scalable Blue Prism automations covering web portal data extraction, email-triggered workflows, SharePoint file handling, and service request creation.
- Reduced manual labour time by 30% and operational errors by 25% by optimizing Blue Prism processes for efficiency and accuracy.
- Implemented multi-bot architecture across multiple virtual machines to complete high-volume workloads within short SLA windows.
- Configured Credential Manager, System tab settings, work queues, and session variables to secure credentials and manage item processing.
- Built exception handling and debugging routines to resolve process issues and improve reliability of live automations.
- Managed Control Room operations, including scheduler maintenance, live-process monitoring, change requests (CR), defect resolution, and client governance calls.
- Collaborated with business analysts and stakeholders to identify automation opportunities and define process requirements.
- Analyzed process data to optimize workflows, produced performance monitoring reports, and trained team members through knowledge-sharing sessions.
- Applied Java-based automation best practices within Blue Prism to improve performance, reliability, and maintainability.
- Earned Monthly Rewards and Recognition (Jul 2022, Mar 2023) and the Client Care Champ Award (Q4 2023-24) for exceptional performance and client service.

Junior Analyst | Aosta Technologies | Dec 2020 – Mar 2021
Project: ExamOne (US healthcare medical records)

- Collected patient medical records from US hospitals and healthcare providers through outbound and inbound calls to support insurance company loan processing.
- Ensured HIPAA compliance, verified medical documentation, and resolved discrepancies to deliver records accurately and on time.
- Maintained accurate database records by entering collected information correctly and promptly.

Education

B.Tech, Civil Engineering | Ponniyah Ramajayam Institute of Science and Technology (PRIST University), Thanjavur | 2020 | CGPA: 7.67

Higher Secondary School | Holy Cross Matriculation Higher Secondary School, Salem | 2016 | 65%

Certification

- Java Selenium and Manual Testing | FITA Academy | Jan 2025 – Apr 2025
- AWS and DevOps | Greens Technology | Nov 2023 – Jan 2024
- Core Java | Klexe Robotics | Apr 2021 – May 2021
