Career Objective

Motivated Information Technology undergraduate with a strong foundation in programming, web development, databases, and problem-solving. Seeking an entry-level software development opportunity to apply my technical skills, contribute to real-world projects, and continuously grow as a technology professional.

Education

B.Tech in Information Technology **2023-2027**
Kongunadu College of Engineering and Technology, Thottiyam. CGPA: 8.74

Higher Secondary Certificate (HSC): 93.3% **2022 – 2023**
Government Higher Secondary School, Balasamudram.

Secondary School Leaving Certificate(SSLC) **2020 – 2021**
St. Mary's High School, Thottiyam.

Internship

Full Stack Web Development Intern – Speculation Info Tech **June 2025**

- Built responsive web pages using HTML, CSS and JavaScript.
- Gained understanding of frontend-backend integration and real-world development workflow.

Projects

RideSafe: Intelligent Helmet for Emergency Detection and Response
Technologies Used: Arduino Nano, Embedded C++, MPU6050 Sensor, SIM800L GSM Module, NEO-6M GPS Module

- Built a smart helmet prototype that continuously monitors rider movement and detects potential accidents using an MPU6050 sensor.
- Implemented GPS tracking and GSM-based SMS alerts to automatically notify emergency contacts with the rider's live location after an accident.

AI-Powered Rain Water Harvesting and Ground Water Analysis System
Technologies Used: Python, Flask, Machine Learning, GIS, HTML, CSS

- Designed an AI model to analyze rainfall and groundwater levels.
- Improved water resource planning through prediction analysis.

IVFD: An Intelligent Visual Forgery Detector For Artificial Visual Content Identification
Technologies Used: Python, PyTorch, OpenCV, Flask, Deep Learning, Computer Vision, HTML, CSS

- Developed an AI-powered system to detect manipulated and AI-generated images and videos using deep learning and computer vision techniques.
- Applied MTCNN, FaceNet, and ResNet-18 for face detection, feature extraction, and visual content classification.

Technical Skills

Programming Languages: Java, Python
Web Technologies: HTML5, CSS3
AI/ML: Machine Learning, Computer Vision, OpenCV
Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks
Database: MySQL, MongoDB
Tools: Git, GitHub, VS Code

Achievements

- Secured **First Prize** in Hackathon and Second Prize in Project Presentation at Periyar Maniammai Institute of Science & Technology, Thanjavur.
- Secured **Second Prize** in Project Expo at Kongunadu College of Engineering and Technology.

Certifications

- **Value Added Course:** Core Java, Cyber Security.
- **NPTEL Certification:** Introduction to IoT, Introduction to Machine Learning.

Co-Curricular Activities

- Participated in Hackathons, Smartathon, and Smart India Hackathon (college level).
- Presented papers in various inter-college technical events and attended workshops.
- Published the research paper "RideSafe: Intelligent Helmet for Emergency Detection and Response" in the `International Journal of Scientific Research Engineering & Technology(IJSRET).
- Published the research paper "IVFD: An Intelligent Visual Forgery Detector For Artificial Visual Content Identification" in the `International Journal of Engineering Research and Science & Technology(IJERST).
