

VISHNUPRIYA V

Professional Summary

Motivated Electrical and Electronics Engineering student with strong interest in Battery Management Systems,

Embedded Systems, and IoT-based solutions. Experienced in AI-based battery State-of-Charge estimation,

GPS-enabled monitoring systems, and power electronics simulations.consequat.

Technical Skills

Programming Languages

- c
- c++
- python
- java

core Electrical Skills

- Battery Management Systems
- Transformers
- Motor Control
- Electrical Machines
- Soc estimation in batteries

Tools and Technologies

Arduino
MATLAB
Solidworks(basic)

Contact

Email:sit23ee008@sairamtap.edu.in
Phone.No: +916379161550

Education

Bachelor of Electrical and Electronics Engineering
Sri Sairam Institute of Technology 2023-2027
Bachelor of Engineering – Electrical and Electronics Engineering
2023 – 2027 | 3rd Year
CGPA: 7.75 / 10

INTERNSHIPS

MIT – Battery State of Charge Estimation using Deep Learning

- Developed Battery State of Charge estimation using deep learning models
- Worked with lithium-ion battery datasets
- Implemented AI-based estimation algorithms
- Analyzed battery performance and accuracy improvement
- Gained hands-on experience in EV battery analytics

IPL Products – Transformer manufacturing and testing

- Studied transformer manufacturing and design
- Observed industrial transformer testing methods
- Learned transformer protection systems
- Performed efficiency calculations and analysis

Worked with practical transformer setups

Teachnook – Battery Management System

- Studied BMS architecture and battery protection systems
- Learned cell balancing techniques
- Analyzed EV battery pack configurations
- Studied battery safety mechanisms
- Understood battery monitoring system

PROJECT

ML-Based Battery State of Charge Estimation

- Developed LSTM-based neural network for SoC estimation
- Used LA92 driving cycle dataset
- Implemented Kalman filter for improved accuracy
- Used voltage, current, and temperature inputs
- Improved estimation accuracy using AI techniques

Smart Drainage Monitoring System (IoT + GPS)

- Your paragrapDeveloped ESP32-based GPS tracking system
- Implemented TinyGPS++ library
- Built Flask backend server
- Integrated Leaflet map for live monitoring
- Designed system for smart city infrastructure

h text

Drone Development and Control System

- Worked on drone hardware setup and configuration
- Studied flight control systems and ESC operation
- Integrated sensors for drone stabilization
- Learned basic drone communication and control
- Explored applications in monitoring and surveillance

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Leadership
- Analytical Thinking
- Time Management

ACHIEVEMENTS

- Developed AI-based battery estimation model
- Built IoT-based smart monitoring system
- Completed multiple technical internships

EXTRA CURRICULAR ACTIVITIES

- Participated in technical workshops
- Attended engineering seminars
- Participated in hackathons and innovatios
- Interested in pencil arts, video editing

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
Vishnupriya V
