Professional Summary

UI/UX Designer with experience designing responsive web and mobile applications using Figma, Adobe Illustrator, Adobe XD, and Canva. Skilled in User Research, User Interface Design, UX Design, Information Architecture, User Flows, Wireframing, High-Fidelity Prototyping, Design Systems, Usability Testing, and Design Handoff. Experienced in collaborating with cross-functional teams to deliver user-centered digital products. Bachelor's degree completed in Information Technology and available to join immediately.

Education

K.S.Rangasamy College of Technology, Tiruchengode, Tamil Nadu Nov 2022 – May 2026
B.Tech in Information Technology **CGPA: 8.4/10**

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning.

Experience

Logo Partner (UI/UX Designer Intern) Jan 2025 – March 2025

- Designed end-to-end user experiences for a wedding and event planning platform across mobile and web interfaces.
- Created wireframes, user flows, and high-fidelity prototypes for vendor discovery, package selection, booking workflows, and payment processes.
- Improved navigation structure through category-based service organization, enabling users to efficiently browse photographers, decorators, venues, and makeup artists.
- Designed review and rating interfaces to enhance user trust and support informed decision-making.
- Collaborated with developers and stakeholders to ensure design consistency and responsive implementation across devices.
- Created reusable design components and maintained visual consistency using design system principles.

Skills

UI/UX Design: User Research, User Surveys, Information Architecture, User Personas, User Journey Mapping, User Flows, Responsive Web Design, Usability Testing, Design Documentation, Design Handoff.

Design Tools: Figma, Adobe Illustrator, Adobe XD, Canva.

AI-Powered Design Tools: Google Stitch, Uizard, Mobbin.

Front-End Basics: HTML, CSS , Java.

Projects

PAWFECT – Pet Care Mobile Application Redesign **Freelance Client Project**

Tools & Process: Figma, Adobe Illustrator, User Research, Information Architecture, User Personas, User Journey Mapping, Wireframing, Prototyping, Design Systems

- Led the complete redesign of a pet care mobile application consisting of 38 screens, transforming an existing product into a more intuitive and user-centered experience.
- Conducted user research, user surveys, competitor analysis, and stakeholder discussions to identify usability issues and define user needs.
- Created information architecture, user personas, user journey maps, and user flows to establish a clear and scalable product structure.
- Designed wireframes, high-fidelity UI screens, interactive prototypes, and reusable design system components to ensure consistency across the application.
- Improved navigation, visual hierarchy, and task flows, resulting in a more engaging and seamless user experience for pet

owners.

Gonest **Multi-purpose Mobile App**

Tools: Figma.

- Designed a comprehensive mobile application integrating e-commerce, hotel booking, shopping, and travel planning functionalities.
- Developed user flows, wireframes, and high-fidelity prototypes focused on seamless cross-platform experiences.
- Applied responsive design principles and scalable component systems to maintain consistency across screens.

Student Connect **Student Career Explorer**

Tools: Figma, Illustrator.

- Designed a modern platform helping students explore colleges, careers, internships, and job opportunities.
- Built interactive features including college discovery modules, job filters, testimonials, and trending opportunity sections.
- Established clear information hierarchy and conversion-focused layouts to improve user engagement.
- Developed reusable design system components and responsive layouts for desktop and mobile experiences.

Certifications

Oracle Cloud Infrastructure Foundations Associate (1Z0-1085-25)

- Gained a strong understanding of Oracle Cloud Infrastructure (OCI) fundamentals, including core cloud concepts, compute, storage, networking, security, identity, and database services.
- Developed knowledge of cloud architecture and OCI best practices, enabling the deployment, management, and monitoring of cloud resources in a secure and scalable environment.
