## ABOUT ME

I am a motivated and enthusiastic final-year B.Tech Agricultural Engineering student with a strong interest in agricultural machinery, farm mechanization, and sustainable farming technologies. I am a quick learner with good communication skills, adaptability, and a positive attitude towards teamwork. I am eager to apply my technical knowledge and continuously develop my skills while contributing effectively to the growth of a reputed organization.

## EDUCATION

GGHSS - PERUNDURAI , ERODE .
12th - 70.67%
NANDHA ENGINEERING COLLEGE, PERUNDURAI ERODE .
B.tech Agricultural engineering , CGPA - 7.7

## LANGUAGES

- Tamil
- English

## INTERNSHIP

- Dharanee agrovator - Bhavani main road perundurai Erode- 638 052
- Sakthi sugars - appakudal Erode
- Arunachala tractors ( John deere ) - chithode, Erode

## SKILLS

- Microsoft excel, word,Autocad,soli -dworks(basics)
- Communication
- Problem solving
- Microsoft PowerPoint
- Task prioritization
- critical thinking
- Leadership
- Food and dairy engineering
- Soil and water conservation
- farm machinery
- Renewable energy resourses
- c-programming (basics)

## PROJECTS

- Low cost manual groundnut pod separator - it is a simple machine that separates groundnut pods from plants quickly and efficiently. It reduces manual labour, saves time, and is affordable for small-scale farmers.
- Manual terrace-making tool - it is a low-cost, eco-friendly agricultural implement designed to create terraces efficiently on sloping land. It combines a spade ,fork and adjustable handle to reduce labour, save time, and improve soil and water conservation.
- Hair catalyst for biodiesel production - Human hair is used as a catalyst source in biodiesel production due to its high keratin content. It helps improve the transesterification process, increasing biodiesel yield in an eco-friendly and low-cost manner.
- Multi furious nutrient farm - it is an integrated farming system that combines crops, livestock, fish, and organic manure production. It improves nutrient recycling, increases farm productivity, and promotes sustainable agriculture.
- Smart water level indicator - it monitors the water level in a tank using sensors. It helps prevent water overflow, reduces wastage, and ensures efficient water management.

## CERTIFICATIONS

1. Nptel courses -

- ELITE SILVER - forest and their management
- soil science and technology,
- advanced aquaculture technology,
- Biomass conservation and biorefinery
- Waste water management
- Innovation Day project certificates
- Paper presentations, image prompting

## DECLARATION

I hereby declare that all the information furnished in this resume is true and complete to the best of my knowledge. I take full responsibility for the accuracy of the information provided.
