ABOUT ME

I'm pursuing a degree in Artificial Intelligence & Data Science, with an interest in programming, problem-solving, AI, UI/UX. I'm building my programming foundation through Java training and practice on LMS, CodeChef, and LeetCode. I have hands-on experience in Java, problem-solving, and OOP. I've also worked with venture studios and incubation centres, supporting early-stage startups through branding, UI/UX, and product design. This combination of technology and creativity helps me approach problems from technical and user-focused perspectives.

TECHNICAL SKILLS

Programming : Java Fundamentals , C

Design Thinking: Problem Framing, Ideation, Solution Validation

Design Tools: Adobe Photoshop, Illustrator, Affinity

UI/UX & Product: Figma, Wireframing
