PROFESSIONAL SUMMARY

Final-year B.E. Computer Science and Engineering (Cyber Security) student with hands-on training in SOC operations, security monitoring, alert triage, log analysis, SIEM, threat intelligence, and incident response. Experienced in analyzing Windows/Linux security events and investigating common attack scenarios through practical labs and TryHackMe. Familiar with Wazuh, Splunk, Snort, Suricata, Wireshark, and MITRE ATT&CK with a strong interest in Security Operations and Blue Teaming.

INTERNSHIP EXPERIENCE

SOC ANALYST L1 INTERN - july 2026 to aug 2026

Marabanu

- Performed alert triage, security monitoring, and log analysis for simulated security incidents.
- Investigated Windows/Linux events, authentication logs, suspicious processes, and network activity.
- Practiced incident documentation, threat intelligence, IOC analysis, and MITRE ATT&CK mapping.

PROJECT

Mini SOC — SIEM-Based Threat Detection & Incident Response

- Built a SOC lab using Wazuh, Windows, Sysmon, Kali Linux, and VirtualBox.
- Investigated brute-force attacks, suspicious PowerShell activity, and account-creation events.
- Created incident timelines, MITRE ATT&CK mappings, findings, and response recommendations.

TECHNICAL SKILLS

SOC: Alert Triage • Log Analysis • Incident Response • Threat Detection • IOC Analysis

SIEM & Network: Wazuh • Splunk • Wireshark • Snort • Suricata

Security: MITRE ATT&CK • Windows Security • Linux • Network Security • Threat Intelligence

Tools: Kali Linux • Sysmon • TryHackMe • VirtualBox • VirusTotal

EDUCATION

B.E. Computer Science & Engineering — Cyber Security
Sengunthar Engineering College
Final Year

- Relevant Areas: Cybersecurity • SOC Operations • Network Security • Ethical Hacking

ADDITIONAL INFORMATION

- Hands-on: TryHackMe SOC & Cybersecurity Labs
- Interests: SOC Operations • Blue Team • Threat Detection • Incident Response
