---

PROFESSIONAL SUMMARY

Innovative and results-driven AEM Full Stack Developer with experience in designing, developing, and optimizing scalable and maintainable solutions. Proficient in AEM architecture, including front-end development, Java back-end development, OSGi services, and component and template customization. Experienced in REST and GraphQL integrations and AEM best practices, with exposure to AEM as a Cloud Service (AEMaaCS). Strong background in Git, CI/CD, Agile development, Azure DevOps, and technical documentation.

TECHNICAL SKILLS

Category	Skills & Technologies
AEM Platforms	AEM 6.5, AEM as a Cloud Service (AEMaaCS), Dynamic Media, Asset Insights, Editable Templates
AEM Core	Java, OSGi, Apache Sling, JCR, HTL, Sling Model Exporters, Workflows, CRON Jobs, Schedulers
Integrations	RESTful Web Services, GraphQL, JDBC, Third-Party API Integration
Front-End	HTML, CSS, JavaScript, Bootstrap, Responsive Design, Modern Web Components
DevOps / Tools	Azure DevOps, Git, GitHub, CI/CD Pipelines, Agile Methodology, Azure Cloud, IntelliJ IDEA, Visual Studio Code, Eclipse IDE

PROFESSIONAL EXPERIENCE

AyTech | Django Developer (Jul 2026 – Present)

- Collaborated with the team following Agile development practices.
- Resolved production issues, implemented enhancements, and participated in code reviews using Git.
- Worked with Django ORM, SQLite/MySQL, and optimized database queries.
- Built REST APIs and integrated front-end components using HTML, CSS, JavaScript, and Bootstrap.
- Designed and implemented CRUD modules, authentication, and role-based access control.
- Developed and maintained web applications using Python and Django.

Air India Digital & Technologies | AEM Full Stack Developer (Feb 2024 – Nov 2024)

- Contributed to the Cargo and Homepage platforms by implementing complex AEM components and Sling Model Exporters optimized for efficient data fetching in the Cloud environment.
- Managed Git branching, merging, and pull requests and supported deployments through CI/CD pipelines in the cloud environment.
- Led component development for the Cargo Project, integrating AEM with external systems using GraphQL APIs for targeted data retrieval.
- Developed custom OSGi Servlets with JWT-based encryption logic for the User Consent Management (UCM) project to enhance application security.
- Worked extensively with Apache Sling, JCR, and HTL.
- Configured and utilized Asset Insights for improved asset management and reporting.
- Leveraged OSGi bundles and AEM best practices for editable template customization and workflow scripting.
- Developed Java-based web components and servlets.
- Managed assets using Dynamic Media Scene7 Classic.

AEM Base Pvt Limited | AEM Full Stack Developer (Nov 2021 – Jan 2024)

- Led end-to-end AEM projects and delivered high-quality solutions.
- Developed AEM components and Sling Models with a focus on performance and scalability.
- Created templates and web pages using AEM Sites, following web development best practices.
- Worked with Apache Sling, JCR (Java Content Repository), and HTL (HTML Template Language).
- Configured and utilized Asset Insights for improved asset management and reporting.

- Developed and deployed OSGi bundles to extend AEM functionality.
- Developed Java-based web components and servlets.
- Implemented RESTful web services using Java APIs and Spring Boot.
- Managed assets using Dynamic Media Scene7 Classic.
- Developed CRON jobs and scheduled reports for automated tasks.
- Developed and customized editable templates.
- Established custom workflows and scripting based on project requirements.

PROJECTS

Project: Cargo Website

- Description: An e-commerce shipment solution within the Air India platform that enables users to sign up, search for products, view promotions, browse product pages, and make payments for transportation services.
- Tools Used: IntelliJ IDEA, Visual Studio Code, Git Repository, GitHub Desktop
- Technologies: AEM Cloud, Java, HTL, CSS, JavaScript
- Development Methodology: Agile

Project: Canara HSBC OBC Life Insurance – Digital Experience Revamp

- Description: Led the transformation of a legacy web portal for a major insurance provider to enhance the digital experience for users purchasing insurance products.
- Tools Used: Eclipse IDE, Git Repository
- Technologies: AEM 6.5, Java, HTL, CSS, JavaScript, Bootstrap
- Development Methodology: Agile

Project: Ecommerce Shopping Cart

- Description: An e-commerce web application where registered and guest users can search for products, view promotions, add products to a cart, save products for later, and make payments.
- Tools Used: Eclipse IDE, Git Repository
- Technologies: Java, HTML, JavaScript, DBMS, CSS
- Development Methodology: Spring, Hibernate, Bootstrap

EDUCATION

Institution	Degree / Focus	Year	Details
Marthandom College of Engineering and Technology	Computer Science and Engineering	2019 – 2021	CGPA: 7.94
Annai Mathammal Sheela Engineering College, Namakkal	Computer Science and Engineering	2011 – 2015	CGPA: 7.24
K.R.G.P.M.H.S.S, Kerala	Physics, Chemistry, Biology	2009 – 2011	Percentage: 83%

CERTIFICATIONS

- Web Designing and Publications – NICT, Kollam (2018–2019)
- Java Full Stack Development – AyTech (2021)
