KAVYA D

Namakkal, TamilNadu 638181|+919385708501| kavaya93857@gmail.com

PROFESSIONAL SUMMARY

Information Technology graduate with a strong foundation in programming, data structures, and web development. Skilled in Python, C, HTML, CSS, and JavaScript, with hands-on exposure to Artificial Intelligence and Machine Learning through internship experience. Experienced in building automation scripts, cloud-based monitoring systems, and interactive dashboards using AWS and Python visualization tools. Passionate about solving real-world problems through technology and continuously learning new skills. Seeking opportunities as a Python Developer / IT professional**.**

EDUCATION

B.Tech., Information Technology —Mahendra Engineering College, Namakkal 2026
CGPA: 8.53

Higher Secondary Certificate (HSC) —SunStar Matric Higher Secondary School, Namakkal 2022

Secondary School Leaving Certificate (SSLC) —SunStar Matric Higher Secondary School,Namakkal 2020

TECHNICALSKILLS

Languages: C, Python
Web Technologies: HTML, CSS, JavaScript
Backend Language: Java
Frontend Frameworks: React
Backend Frameworks: Django, Node.js
Database: MySQL

INTERNSHIP EXPERIENCE

Artificial Intelligence and Machine Learning Intern/ *Gateway Software Solutions* Sep 2025– Oct 2025 |Coimbatore, India

- Worked on **Artificial Intelligence and Machine Learning,** gaining hands-on experience with various technical and analytical techniques.
- Developed an **AI-powered chat box using Python and Natural Language Processing(NLP)** to understand user queries and the generate automated responses. This project enhances the user interaction by providing quick and accurate responses through a simple and user friendly interface.
- Worked on **Artificial Intelligence and Machine Learning,** gaining hands-on experience with various technical and analytical techniques.

.

PROJECTS

Smart Log Silence Detection System (Python)

- Developed a Python-based system to detect periods of login activity using time stamp analysis and threshold logic**.** Automated aleart notifications through email and dashboard updates for quick issue detection.

- Implemented automated aleart notifications via email and alive dashboard using AWS Lambda s3 and cloud Watch

Heuristic Based Network Threat Detection Using Python ***(Python)***

- Developed a Python-based cyber security system to detect phishing links and malicious URLs and virus total API
- Generated risk scores and security alerts for real-time threat detection and monitored network traffic.
- To identify suspicious and malicious activity to perform the real time analysis of network traffic.
- To improve threat detection accuracy and support proactive cyber security monitoring.

CERTIFICATIONS

- NPTEL–Programming in Java, Social Networking Analysis, Ethical Hacking
- EC-Council–Node.js Essentials
- MongoDB Certificate

ADDITIONALTRAINING

- Node.js, Express.js & MongoDB - Backend web Development
