Ranjith Balaji

SOC Analyst | Cyber Security Analyst

+91-9944927263 | ranjithbalajip@gmail.com | LinkedIn

Professional Summary

SOC Analyst with 1+ years of experience in Tier 1 security monitoring, incident triage, and threat analysis within an MSSP environment. Experienced with AlienVault USM (Level Blue), Elastic Security (Kibana), Malwarebytes EDR, Windows Security Event analysis, Active Directory investigations, firewall monitoring, and client security reporting. Skilled in SIEM monitoring, log analysis, phishing investigations, authentication analysis, incident escalation, and presenting monthly security reviews.

Professional Experience

SOC Analyst (L1) Jun 2025 – Present

Digital Insights (Remote)

- Monitor and investigate security alerts across multiple client environments using AlienVault USM (Level Blue) and Elastic Security (Kibana).
- Analyze Windows Security Events, Active Directory logs, Kerberos authentication failures, firewall events, and endpoint alerts.
- Investigate phishing emails, unauthorized logins, privileged account activities, malware, and suspicious file-sharing events.
- Validate endpoint detections using Malwarebytes EDR and escalate confirmed incidents following SOC playbooks and SOPs.
- Perform log correlation, threat analysis, and incident validation to determine the scope and severity of security incidents.
- Prepare investigation summaries, maintain incident documentation, and support incident response.
- Generate weekly and monthly security reports highlighting incident metrics and threat trends.
- Present monthly security review reports covering key incidents, threat trends, and mitigation status.

SOC Intern Apr 2025 – Jun 2025

Digital Insights (Remote)

- Assisted Tier 1 analysts with security monitoring, alert triage, and log analysis.
- Participated in incident response simulations and SOC workflow exercises.
- Practiced ticketing workflows, alert prioritization, and incident documentation following SOC procedures.
- Gained hands-on experience with SIEM monitoring, firewall log analysis, endpoint security, and incident response processes.

Technical Skills

SIEM:	AlienVault USM (Level Blue), Elastic Security (Kibana), Splunk (Fundamentals)
Endpoint Security:	Malwarebytes EDR
Windows & Active Directory:	Windows Server, Windows Event Analysis, Active Directory, Kerberos Authentication
Security Operations:	Incident Response, Security Monitoring, Alert Triage, Event Correlation, Log Analysis, Threat Intelligence
Networking:	TCP/IP, DNS, RDP, NAT, Firewall Analysis
Reporting:	Client Reporting, Weekly & Monthly Security Reports, Incident Documentation, SOP Adherence

Education

B.E – Electrical and Electronics Engineering May 2025

Sri Krishna College of Technology - Coimbatore

CGPA: 7.48 / 10
