PROFESSIONAL SUMMARY

B.E. Computer Science graduate and Software Developer Intern with hands-on experience in Java, Spring Boot, Servlets, JDBC, REST APIs, JPA/Hibernate, jOOQ, PostgreSQL, Prisma ORM, and JWT Authentication. Proficient with Apache Tomcat, Maven, and Git. Built scalable backend applications and full-stack projects with optimized database performance. Solved 350+ LeetCode problems, demonstrating strong problem-solving and algorithmic skills. Seeking an entry-level Backend Developer or Software Engineer role.

PROFESSIONAL EXPERIENCE

Software Developer Intern | ZHA Technologies

May 2026 – Present

- Developing backend applications and RESTful APIs using Java, Servlets, and JDBC, gaining hands-on experience in enterprise Java backend development.
- Building and testing REST API endpoints to support core application functionality and ensure reliable client-server communication.
- Performing database operations and CRUD functionality using JPA (Hibernate) and jOOQ for type-safe, efficient data access.
- Writing and optimizing SQL queries in PostgreSQL to support application data requirements and improve query performance.
- Deploying and configuring backend applications on Apache Tomcat, and managing project builds and dependencies using Apache Maven.
- Using Git for version control and collaborative development, contributing to ongoing projects alongside the engineering team.
- Applying software development best practices including clean code principles, modular design, and API testing workflows.

PROJECTS

Student Attendance Management System *Jan 2026*

- Built a QR-code-based full-stack attendance system using Spring Boot, JWT authentication, and RBAC for admin, faculty, and student roles managing 500+ student records.
- Implemented background jobs for automated late-entry detection, reducing manual follow-up by 60%; maintained full audit logs for traceability.
- Designed normalized PostgreSQL schema reducing query response time by 35% compared to flat-table design.

Billing & Inventory System *Mar 2026*

- Architecting backend for billing workflows and real-time inventory tracking with JWT-secured REST API endpoints and role-based access control.
- Designing normalized PostgreSQL schema with Prisma ORM for type-safe database access, efficient migrations, and zero data anomalies.

Hotel Website (Freelance) *Dec 2025*

- Delivered a responsive, mobile-first hotel website with QR-based digital menu integration; achieved Google PageSpeed score of 85+.
- Applied SEO best practices and semantic HTML5, improving organic search visibility and reducing page load time by 40%.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES2022+)

Backend: Spring Boot, Node.js, REST API Design, JDBC, Servlets, JPA, Hibernate, JOOQ, Cookies, JWT Authentication, Role-Based Access Control (RBAC)

Database: PostgreSQL, Prisma ORM, Schema Design, Query Optimization

Frontend: HTML5, CSS3, JavaScript

Tools: Git, GitHub, Postman, Apache Maven, Tomcat, IntelliJ IDEA, Visual Studio Code, GitHub Copilot

Concepts: Data Structures & Algorithms (DSA), OOP, API Design, Microservices Basics

Operating Systems: Linux (Ubuntu)

EDUCATION

Jan 2022 – May 2026

Bachelor of Engineering in Computer Science

PSN Engineering College, Anna University | Tamil Nadu, India

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank Certified – Java: Validated core backend development skills with industry-recognized credential.
- HackerRank Certified – Problem Solving: Verified algorithmic and data structures proficiency.
- 350+ DSA Problems Solved on LeetCode focusing on time and space complexity, demonstrating strong algorithmic thinking and problem-solving fundamentals.
