# GOWRI S

Madurai, Tamil Nadu, India
+91-08838340123 gowrisiva2233@gmail.com LinkedIn

## Summary

Aspiring Java Developer with strong knowledge in object-oriented programming, Java, JDBC, and database concepts. Hands-on experience in developing IoT-based systems and Java applications. Skilled in problem-solving, teamwork, and building efficient software solutions.

## Profile Links

GitHub: ***github_link***
LeetCode: ***leetcode_link***
HackerRank: ***hackerrank_link***

## Education

**PSNA College of Engineering and Technology, Dindigul** 2023 - Present
B.Tech in Computer Science and Business Systems - CGPA: 8.47

**Sairam Matriculation Higher Secondary School, Madurai** 2022
Higher Secondary Education - Percentage: 80%

**Sairam Matriculation Higher Secondary School, Madurai** 2021
Secondary School Education

## Internship

**Code Alpha - Java Intern** Aug 2025 - Sep 2025
Virtual Internship ***Certificate***

- Developed three Java-based applications are Student Grade Tracker, Stock Trading Platform, and Hotel Reservation System as part of the Code Alpha Virtual Internship to solve real-world management and tracking problems.
- Applied object-oriented programming concepts, arrays, exception handling, and file handling techniques to design efficient and functional console-based applications with structured workflows.
- Enhanced coding, debugging, analytical thinking, and project management skills through real-time application development, testing, and implementation of user-focused solutions.

## Projects

**IoT-Enabled Smart Two-Wheeler Parking & Road Safety System** ***GitHub***

- Developed an IoT-based Smart Parking System using Arduino sensors to monitor parking slot availability in real time, helping users quickly identify vacant parking spaces and improving overall parking management efficiency.
- Integrated sensor-based detection and automated monitoring to reduce manual effort, minimize parking congestion, and provide accurate parking status updates.
- Enhanced user convenience and road safety by enabling faster parking decisions through real-time data processing and smart alert mechanisms.
- Tools: Arduino, Sensors, IoT, Web Application

**IoT-Based Smart Salt Monitoring System** ***GitHub***

- Developed an IoT-based brine salinity monitoring system with real-time tracking to continuously monitor salinity levels and improve salt production quality.
- Integrated corrosion-resistant sensors and wireless communication modules to provide accurate data collection and instant alert notifications with reduced manual intervention.
- Enhanced production efficiency and decision-making by enabling automated monitoring, faster issue detection, and reliable real-time analysis of salinity conditions.
- Tools: IoT, Salinity Sensors, Wireless Communication, Telegram Bot

**IoT-Based Smart Milk Quality Analyzer** ***GitHub***

- Developed an IoT-based milk quality detection system using sensors and a microcontroller to monitor milk quality in real time and identify unwanted substances efficiently.
- Integrated automated sensing and data analysis techniques to reduce manual testing effort, improve detection accuracy, and ensure reliable quality assessment.
- Enhanced food safety and monitoring reliability by enabling faster quality checks, real-time analysis, and efficient decision-making through smart sensor technology.
- Tools: Arduino UNO, Sensors, IoT

## Technical Skills

Programming Languages: Java, Python (Basics)
Web Development: HTML, CSS, JavaScript (Basics)
Backend & Concepts: JDBC, OOP Concepts
Database: MySQL
Tools: VS Code, Eclipse, Apache NetBeans IDE, Arduino IDE, GitHub, MS Office

## Certifications

- Java Programming Basics - Great Learning (Jul 2025) ***Certificate***
- Basics of Python - Infosys Springboard (Oct 2023) ***Certificate***
- Internship Common Aptitude Test (ICAT) - Jul 2025 ***Certificate***
- Java Programming Course for Beginners - ScholarHat (Sep 2025) ***Certificate***

## Hackathons

**Tech Spectrum '24 – National Level Technical Symposium - SRM Institute of Science and Technology, Tiruchirappalli (2024)**

- Participated in a national-level technical symposium focused on innovation, technical learning, and collaborative problem-solving activities.
- Worked effectively with team members to present creative ideas, discuss technical solutions, and contribute to project-based discussions and competitions.

**Tech Tatva 2025 – National Level Technical Hackathon - Maharaja Institute of Technology (MIT), Mysore (2025)**

- Participated in a national-level hackathon focused on developing innovative and practical solutions for real-world challenges within a limited timeframe.
- Enhanced collaboration, critical thinking, problem-solving, and project execution skills through active participation in competitive technical activities.
