SANJAY C

PYTHON DEVELOPER - DATA SCIENTIST - AI ENGINEER

8015178475 sanjaythe9788@gmail.com linkedin.com/in/sanjay-c- Salem,Tamilnadu SanjayChandrasekar

Career Objective

Motivated Computer Science undergraduate with hands-on experience in real-world project development at a reputed company. Proficient in **Python and C**, with foundational knowledge in **Data Science and Machine Learning**. Eager to apply technical skills and creative problem-solving to build scalable and impactful software solutions. Seeking opportunities to grow as a developer in a dynamic, innovation-driven environment while contributing to meaningful tech initiatives.

TechnicalSkills

- **Programming languages:**Python ,C program.
- **Data Science:**Data preprocessing, Feature engineering, Exploratory data analysis.
- **Machine learning:**Regression, classification, clustering.
- **Frameworks & Libraries:** TensorFlow, Keras, scikit-learn, OpenCV, Pandas.
- **Database:** MySQL - (Query Writing, Joins, Filtering, and Database Management).
- **Version Control:** Git, GitHub.

Internships

INTERN-ABE Group Aug 2024

- Assisted in data collection and preprocessing for **ML** models.
- Supported basic tasks using **python** and libraries like **pandas.**

INTERN-Livewire,Salem Feb 2025

- Internship on **passport Authentication** and **CRUD operation** in **MERN Stack**(Developed and tested **CRUD APIs** using Node.js and Express.js).

Projects

Public Issue Reporting & Smart Prioritization System github.com

- Built a voice-first **SaaS** complaint system using **OpenAI** Whisper for multilingual speech-to-text.
- Designed an **NLP** pipeline with DistilBERT, RoBERTa, VADER, and spaCy for classification and sentiment analysis.
- Developed a five-factor prioritization algorithm ensuring fair and efficient complaint handling.
- Achieved 91.5% intent-classification accuracy with an average processing latency of under 7 seconds, using a microservices and dual-database architecture.

Wildlife Conservation Using AI github.com

- Built an **AI Model** to detect and classify animal species from images.
- **Tools Used:** Python,TensorFlow,Keras,and OpenCV for development.
- Applied **CNNs** and image recognition for wildlife identification.
- Enhanced **accuracy and efficiency** in wildlife monitoring.
- Supported conservation efforts through AI-driven automation.

Education

B.E., Computer Science and Engineering : 2022-2026.

AVS Engineering College.

- GPA:**8.5/10**

Higher Secondary

Bharathi Matriculation Higher Secondary School.

- Percentage: **80%**

Certificates

- **C program:**SriSaai Computer Centre,Salem.
- **Python Course:**PJC Computer Centre,salem.
- **Data Science:**Livewire,salem.
