PROFESSIONAL SUMMARY

Full stack developer (B.Tech IT, 2026) with hands-on experience across frontend, backend, and mobile. Built a real-time task management app at Gateway Solutions using Flutter, SQLite, and Firebase. Engineered a full-stack Face Recognition Attendance System (Python, OpenCV, Pandas) with automated reporting. 2nd place, EDU-HACK-INSPIRE-2K24. Looking to bring end-to-end development skills to an entry-level Software Developer role.

TECHNICAL SKILLS

Frontend: HTML5, CSS3,JavaScript,React.js,Bootstrap, Responsive Design
Backend: Python, PHP
API Integration: Firebase REST APIs, Firebase Authentication
Mobile Development: Flutter, Firebase
Database: MySQL, SQLite(Auth, Realtime DB)
Data Processing: Pandas
Tools & Platforms: Git, GitHub, VS Code

INTERNSHIP EXPERIENCE

Flutter Intern – Gateway Solutions Sep 2024 – Nov 2024

- Developed a real-time task management mobile application using Flutter and SQLite for local data storage
- Integrated Firebase Authentication and real-time database to enable seamless user login and data synchronization
- Designed and implemented custom UI animations to enhance user experience across multiple screens
- Collaborated with the development team throughout the app development lifecycle, from planning to deployment

PROJECTS

Face Recognition

- Engineered a real-time attendance system using Python and OpenCV, achieving reliable face detection and recognition
- Trained and optimized a custom face recognition algorithm to automatically identify and mark student attendance with improved accuracy
- Automated end-to-end attendance logging and generated detailed Excel reports using Pandas, eliminating manual record-keeping
- Designed the system architecture to handle multiple student profiles, enabling scalable attendance tracking for classroom-sized groups

AI-Based Fake News Detection System

- Built a text classification system in Python to detect fake news, applying NLP preprocessing techniques for accurate content analysis
- Trained a machine learning model to analyze news content and predict authenticity with measurable accuracy
- Designed a simple, user-friendly web interface enabling real-time news verification
- Structured the data pipeline for efficient text processing, from raw input to prediction output

EDUCATION

B.Tech IT – Mahendra Institute of Technology (2022–2026) Namakkal CGPA: 7.74
HSC – 60% SSLC – 60%

ACHIEVEMENTS

- Completed a certified graphics designing course in Zentechpark - Erode
- 2nd Prize-EDU-HACK-INSPIRE-2K24 Organized by Mahendra Institutions
- Published academic projects on GitHub with documented source code
