SYED THOUFIQ R

Data Analyst

thoufiqsyed3@gmail.com | +91 7397500449 | Hosur, Tamil Nadu | linkedin.com/in/stthoufiq

PROFESSIONAL SUMMARY

Detail-oriented B.Tech IT graduate (CGPA: 7.98) with hands-on experience in Excel, Power BI (DAX, Power Query, data modeling), Python-based data analysis (Pandas, NumPy), and SQL. Built end-to-end BI dashboards translating raw sales data into actionable business insights, and produced structured findings reports during a security assessment internship. Looking to bring analytical rigor, dashboarding skills, and clear reporting to a Data Analyst role.

TECHNICAL SKILLS

Data & Reporting Tools: Excel, Power BI, SQL, IBM Watson, Data Visualization

Programming: Python (Pandas, NumPy), basic scripting for data processing

Databases: MongoDB, SQLite

Concepts: Data Analysis & Reporting, Data Structures & Algorithms (DSA), Data Visualization, RESTful API Integration (data ingestion), SDLC & Agile Methodologies

AI Tools: IBM Watson Studio, Generative AI Tools (ChatGPT, Claude) for data analysis & automation

INTERNSHIP EXPERIENCE

Cyber Security Intern — *VEI Technologies* (Jul 2023)

- Executed vulnerability scans and security assessments across 10+ systems, surfacing 12+ exploitable risks and producing structured findings reports delivered directly to senior engineers.
- Mapped attack surfaces using assessment checklists and documented remediation recommendations, contributing to the team's security review pipeline.
- Built working knowledge of network security protocols and threat identification workflows, with an emphasis on clear, structured reporting.

Core Java Intern — *EMIGLITZ Technologies* (Jan 2023)

- Refactored 4 Java modules applying OOP design patterns, cutting runtime errors by 30% and improving execution efficiency by 15% through targeted exception handling and file I/O optimisation.

PROJECTS

Chocolate Factory Sales Dashboard — *Power BI, Power Query, DAX, Excel*

- Built an end-to-end Power BI dashboard for a chocolate factory/store business, importing and cleaning raw sales data with Power Query and modeling relationships across products, stores, and time.
- Wrote DAX measures to track revenue, profit margin, and top-selling products, surfacing KPIs through interactive visuals, slicers, and drill-throughs for store-level performance analysis.
- Designed a single-page interactive report enabling quick filtering by product category and store location to support data-driven business decisions.

AI Chatbot Assistant — *IBM Watson Studio, MongoDB*

- Designed structured JSON-based data contracts between frontend and backend, ensuring clean, consistent data flow across the system.
- Monitored system data integrity under load, sustaining 200+ daily interactions with no data loss — validated through repeated load testing and result tracking.
- Used IBM Watson Studio for intent recognition, translating unstructured user input into structured, actionable data.

Automated Video Translation Tool — *Python*

- Built an end-to-end data pipeline — audio extraction, translation API calls, subtitle sync, video reassembly — processing content into 6+ languages.

EDUCATION

B.Tech — Information Technology, CGPA: 7.98 — *Hindusthan College of Engineering and Technology, Coimbatore* (2021 – 2025)

HSC (Class XII) — 88% — *Sri Vijay Vidyalaya Matric Higher Secondary School, Hosur* (2020 – 2021)

CERTIFICATIONS

- Data Visualization — IBM
- Business Intelligence — IBM
- Design Thinking — IBM
- Python Web Developer — Capgemini
