Professional Summary

Software Engineering undergraduate (Expected May 2027) with **6 months of backend development internship experience** building RESTful APIs for SaaS applications. Proficient in Java, Python, JavaScript, React.js, Node.js, MongoDB, and PostgreSQL, with a strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and Software Development Lifecycle (SDLC). Passionate about learning new technologies and building high-quality software.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript (ES6+), SQL
- **Computer Science:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Lifecycle (SDLC), Debugging,
- **Web Technologies:** HTML5, CSS3, React.js, Node.js, Express.js, RESTful APIs, Redux, Tailwind CSS
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, GitHub, Postman, Agile/Scrum
- **AI/ML:** OpenCV, VGG-Face, Computer Vision

Experience

Backend Developer Intern (6 Months) Nov 2025 – May 2026
Webzspot, Chennai

- Developed and tested RESTful APIs using **Node.js** and **Express.js** for a SaaS application, following clean coding practices and reusable software design.
- Collaborated with engineers to develop software features, debug issues, write maintainable code, participate in code reviews, and incorporate technical feedback.

Personal Project – Trende E-Commerce Jan 2026 – Jun 2026
MERN Stack

- Built a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB with secure authentication and responsive user interfaces.
- Implemented secure RESTful APIs with JWT authentication and integrated Razorpay payment services.
- Improved application performance by 30% through code splitting, lazy loading, and frontend optimization.

Projects

AI-Based Attendance System | **Python, OpenCV, VGG-Face**

- Built an AI-powered attendance system achieving over 95% recognition accuracy using Python, OpenCV, and VGG-Face.
- Designed and tested a real-time face recognition system using Machine Learning and Computer Vision techniques.

Education

Nandha Engineering College, Erode Expected May 2027
B.E. Computer Science & Engineering (IoT) – CGPA: 7.2
