DAS VIGNESH S

Python Full Stack Developer | Django | React.js | REST APIs | MySQL

Salem, Tamil Nadu, India | +91-9360722523 | iamdasvignesh@gmail.com | linkedin.com/in/iamdasvignesh | github.com/iamdasvignesh

PROFESSIONAL SUMMARY

Entry-level Python Full Stack Developer who shipped 15+ secured API endpoints, a normalized 6-table database, and 2 full-stack apps during an internship at LIVEWIRE, Salem (Aug 2025 – Feb 2026). Builds with Python, Django, DRF, React.js, JavaScript (ES6+), and MySQL — comfortable owning a feature from schema to responsive UI, with working knowledge of RBAC and Agile workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3

Backend: Django, Django REST Framework (DRF), RESTful API Development, JWT Authentication, RBAC, MVT Architecture, ORM, Unit Testing

Frontend: React.js, React Hooks, Bootstrap, jQuery, AJAX, Responsive Web Design, UI/UX Best Practices

Databases: MySQL, SQLite, Schema Design, Normalization, SQL Joins, Query Optimization, Indexing

Tools & Practices: Git, GitHub, VS Code, Postman, pip, virtualenv, Agile/Scrum, Debugging, Linux Basics

PROFESSIONAL EXPERIENCE

Python Full Stack Development Intern | *LIVEWIRE, Salem* Aug 2025 – Feb 2026

- Delivered 2 full-stack applications end-to-end — database schema through responsive UI — using Python, Django, React.js, and MySQL in an intensive, project-based training track.
- Built and debugged 10+ CRUD-based modules with role-based authentication, cutting manual data-entry errors through structured form validation and server-side checks.
- Participated in Agile sprint cycles and peer code reviews via Git/GitHub, shipping iterative feature updates on a 2-week release cadence.
- Developed responsive, mobile-first frontend interfaces wired to backend REST APIs, enabling real-time data updates across 3+ modules.

PROJECTS

Employee Operations Management System | *Python, Django, DRF, MySQL, Bootstrap* Jan – Mar 2026

- Architected a full-stack role-based management application (Admin, Manager, Employee) on Django MVT, automating approval workflows to remove manual sign-off steps.
- Engineered and shipped 15+ API endpoints for Product, Customer, and Order modules with JWT-secured DRF authentication, reaching 100% CRUD coverage validated via 50+ Postman tests.
- Designed and normalized a 6-table MySQL schema, applying select_related and strategic indexing to cut relational query response time.
- Implemented RBAC across 3 user roles, closing off unauthorized data access and enforcing separation of duties. GitHub: github.com/iamdasvignesh

Food Ordering Web Application | *React.js, JavaScript, HTML5, CSS3, Bootstrap* Apr – May 2026

- Built a responsive single-page food ordering app with 8+ reusable React components, cutting duplicated UI code across menu, cart, and checkout views.
- Implemented dynamic cart logic (add/remove/quantity) with live order-total calculation and localStorage persistence, eliminating cart loss on page refresh.
- Integrated JSON-based REST APIs using async/await, adding loading and error states that kept the UI responsive under slow or failed network calls.
- Delivered a mobile-first responsive layout validated across 3+ screen sizes for consistent cross-device performance. GitHub: github.com/iamdasvignesh

EDUCATION

Bachelor of Engineering — Electrical and Electronics Engineering | *Paavai College of Engineering, Tamil Nadu* 2025

CGPA: 7.2 / 10

CERTIFICATIONS

- Certified Python Full Stack Developer — LIVEWIRE, Salem (2025 – 2026)

ADDITIONAL INFORMATION

Languages: English, Tamil

Availability: Immediate joiner | Open to relocation across India
