OBJECTIVE

Detail-oriented and hands-on professional with a Bachelor of Engineering (B.E.) in Electronics and Communication, complemented by verified practical certifications in Computer Hardware & Networking and Cisco Network Basics tracks. Seeking an entry-level Infrastructure Support, Hardware Services, or Network Operations Associate role where I can apply proven technical capability in physical workstation assembly, core IP addressing configurations, local infrastructure diagnostics, and professional digital layout design. Highly reliable at adhering to standardized operating workflows, executing diagnostic processes, and maintaining accuracy under structured operational parameters.

CORE TECHNICAL COMPETENCIES

- Systems & Hardware Support: Workstation Assembly, Component Upgrades, Device Troubleshooting
- Infrastructure & Setup: Windows OS Deployment, System Formatting, Driver Configuration
- Networking Foundations: LAN Connectivity, IP Addressing Basics, Cable Testing
- Creative & Visual Tools: Adobe Photoshop, Illustrator, Premiere Pro, After Effects
- Operational Strengths: Workflow Adherence, Logic Foundations (Abacus), Procedure Tracking

EDUCATION & ACADEMIC CREDENTIALS

B.E., Electronics & Communication — Sona College of Technology *2020*

Diploma in C-Tech FX — Image Institute *2024*

Diploma in Electronics & Communication (D.ECE) — C.S.I Polytechnic College *2017*

CERTIFICATIONS & ACADEMIC TRAINING

- Cisco Networking Academy Module Badges (2025): Internet Protocol Basics, Network Communications Basics, Network Access Basics, Network Basics
- Professional Certificate in Computer Hardware & Networking: components setup, device diagnostic tools, OS deployment
- Logic Training Certification (Abacus Framework): structural analysis and precision numeric tracking

PRACTICAL TECHNICAL PROJECTS

Touch-Screen Kiosk Interface Assembly *Diploma Final Year Project*

- Fabricated and troubleshot physical touch-panel display hardware framework, connecting layout interface adapters
- Configured local hardware-to-software parameters and manually tested inputs to resolve interface latency

Visual Data Feature Organization *B.E. Final Year Project*

- Structured, formatted, and verified massive visual validation datasets for image categorization setups using Support Vector Machine (SVM) logic models
- Maintained workstation parameters and system logging records to systematically eliminate compilation run errors

PROFESSIONAL EXPERIENCE

Freelance Technical Assistant & Visual Designer — Remote *2024 – Present*

- Configured local workstation infrastructure and OS modules to maintain seamless environment runtimes
- Administered digital media rendering files using Adobe systems, organizing asset pipeline verification

Business Development Associate (BDA) *2020 – 2023*

- Maintained and logged system database client files accurately per corporate compliance metrics
- Orchestrated tracking data updates and written operational reviews across administrative teams
