KANNAN A

Kumbakonam, Tamil Nadu • +91 7418599677 • officially4sanjay@gmail.com • linkedin.com/in/kannan12

B.Tech CSE (Data Science) graduate with skills in **Python, SQL, Power BI, Tableau, React, and AI tools**. Strong interest in data-driven problem-solving, AI applications, and business processes, with hands-on experience through academic projects. Adaptable and eager to apply technical and analytical skills to real-world challenges while continuously learning new technologies.

EDUCATION

B - TECH in COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

KALASALINGAM UNIVERSITY • GPA: 7.75 • 09/2022 - 05/2026

VOLUNTEERING & LEADERSHIP

NATURE CLUB • 01/2025 - 01/2026

Media Team Head

Drove promotional activities for awareness drives, sustainability initiatives, and campus events, strengthening outreach and engagement while coordinating media operations and cross-team collaborations with internal and external organizations.

WORK EXPERIENCE

MedTourEasy

Data Analytics Trainee

Completed data analytics training in **data cleaning, exploratory analysis, SQL, Python, and data visualization**, followed by a **healthcare analytics project** involving data analysis, visualization, reporting, and presentation of key findings.

PROJECTS

LLM Guided Learning Platform – AI-Powered EdTech Project • 02/2026 - 04/2026

- Developed an **LLM-based learning platform** with personalized learning paths, interactive tutoring, and skill graphs for adaptive content recommendations.
- Built **Python REST APIs** and a **React** interface for real-time doubt resolution and learner progress visualization.

Pneumonia Detection System – AI/ML Project • 06/2025 - 10/2025

- Developed a **CNN-based pneumonia detection system** using Python, TensorFlow/Keras, and image preprocessing for chest X-ray classification.
- Integrated an **AI chatbot** for symptom queries and result interpretation, with a web interface for real-time predictions and a **Power BI dashboard** to visualize prediction results, dataset insights, and model performance.

Fall Detection System for Wheelchairs – IoT & AI Project • 10/2023 - 01/2024

- Developed a fall detection system using **MPU6050** sensors and Python-based threshold algorithms to detect motion, tilt, and sudden impacts.
- Integrated **ESP8266 Wi-Fi** for real-time alerts to caregivers through a monitoring interface, improving wheelchair user safety.

SKILLS

Python, Java, C, SQL | Power BI, Tableau, Excel | React, Flutter, REST APIs | Machine Learning, CNN, LLMs | Git, GitHub, Claude, ChatGPT
