PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science graduate with hands-on experience in Python development, Django, Flask, React, Node.js, Machine Learning, Generative AI, and AWS cloud technologies. Skilled in designing scalable web applications, integrating REST APIs, and building AI-powered solutions. Seeking a Software Developer / AI Engineer role to apply full-stack and ML expertise to real-world problems.

EDUCATION

Bachelor of Science in Computer Science — KSR College of Arts and Science for Women (Periyar University)
Graduation: 2026

CGPA: 8.7 / 10

PROFESSIONAL EXPERIENCE

Python Developer Intern — Yale IT Skill Hub *May 2025 – Jun 2025*

- Developed Django-based web applications using Python and modern software development practices.
- Integrated REST APIs to enable efficient communication between frontend and backend services.
- Optimized database operations using MySQL and SQLite for better application performance.
- Collaborated with development teams using GitHub version control and followed structured coding practices.

PERSONAL PROJECTS

AI Interview Preparation Platform

- Built an AI-powered interview preparation platform using Python, Django, Machine Learning, and Generative AI.
- Implemented resume analysis, AI-generated interview questions, coding assessments, and personalized feedback with a responsive UI.

Personality-Based Team Builder

- Built a Django web application that forms optimized teams based on personality traits, technical skills, and compatibility.
- Implemented AI-driven recommendation logic along with secure authentication, user profiles, and interactive dashboards.

Real-Time Language Translator

- Developed a real-time multilingual translation application using Python and AI technologies.
- Integrated speech-to-text and text-to-speech functionality for seamless voice-based communication.

Freshness Detection using Deep Learning

- Built a deep learning application to classify fruits and vegetables as fresh or rotten using image classification models.
- Designed a user-friendly interface to upload images and display real-time freshness prediction results.

Student Performance Analyzer

- Built a data-driven application to analyze and predict student academic performance from historical records.
- Used Python and Machine Learning to identify performance trends and generate insights via visual dashboards.

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript
Frontend: React, Tailwind CSS
Backend / Frameworks: Django, Flask, Node.js, Express.js
Databases: MySQL, SQLite
Cloud & AI: AWS, Machine Learning, Generative AI
Tools: VS Code, GitHub
Concepts: REST APIs, Web Development, OOP, Database Design, Version Control

CERTIFICATIONS

- Python Programming Certification
- AWS Cloud Practitioner
- Machine Learning Certification
- Generative AI Certification
