SUMMARY

Motivated Computer Engineering student (B.E.) with hands-on experience building AI-powered tools, full-stack web applications, and student-focused platforms. Passionate about developing clean, maintainable, and user-centered applications that solve real-world problems. Proficient in both front-end and back-end technologies with a strong foundation in data structures, algorithms, and software design principles. Comfortable collaborating in agile team environments, adapting quickly to new technologies, and delivering high-quality solutions under deadlines. Actively seeking an internship or entry-level role in full-stack or AI-integrated development.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Vite, Bootstrap
Tools & Platforms: Git & GitHub, Linux, VS Code, Postman, Chrome DevTools, AWS
AI/ML Tools: OpenCV, TensorFlow (Basics)
Databases: MongoDB, MySQL (Basics), Supabase
Soft Skills: Communication, Problem Solving, Teamwork, Leadership, Fast Learner, Logical Thinking

EDUCATION

Mahendra College of Engineering, Salem, Tamil Nadu
Bachelor of Engineering (B.E.) in Computer Engineering
CGPA: 7.4 • Duration: Sep 2022 – May 2026 • Expected Graduation: May 2026
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Software Engineering, Artificial Intelligence.

PROJECTS

Visual Sentinel — *AI-Powered Phishing Website Detection System (Final Year Project)*
- Developed a cybersecurity platform to detect phishing websites and brand impersonation attacks using React.js, Node.js, and Express.js.
- Implemented DNS analysis, SSL certificate validation, and security header inspection for website trust assessment.
- Integrated Google Safe Browsing, VirusTotal, OpenPhish, and PhishTank APIs for real-time threat intelligence analysis.
- Built visual phishing detection using Perceptual Hashing (aHash) and Hamming Distance algorithms.
- Designed a risk-scoring engine to generate security reports and phishing risk classifications.

Link

RelxPrep AI — *AI-Powered Student Exam Preparation Platform*
- Developed a full-stack AI-powered platform for student exam preparation using React.js and Node.js with a fully responsive and accessible UI across all devices.
- Enables students to upload documents and PDFs to receive AI-generated simplified summaries, making complex study material easier to understand.
- Integrated an intelligent AI assistant that helps students grasp difficult topics through step-by-step explanations and adaptive learning suggestions.
- Implemented voice assistant-based tests and mock assessments to simulate real exam conditions and reinforce learning through active recall.
- Supports bilingual explanations in both Tamil and English, ensuring accessibility for a wider student audience.

AI-Powered Smart Attendance System
- Built a real-time face recognition attendance system achieving 94% accuracy using OpenCV and Flask backend.
- Automated attendance tracking and logging with a live admin dashboard for monitoring student presence.
- Configured automated email alert notifications to inform teachers and students of attendance status instantly.
- Optimized for low-latency detection, making the system suitable for real-time classroom deployment.

CERTIFICATIONS

Python Certification — freeCodeCamp
- Completed structured Python programming modules covering core language fundamentals, data handling, and scripting best practices.
- Applied Python skills through practical exercises and projects to reinforce programming proficiency.

AWS Cloud Certification — Naan Mudhalvan
- Gained foundational knowledge in AWS cloud services, core infrastructure, and cloud deployment concepts.
- Completed hands-on labs and assessments covering compute, storage, and networking on the AWS platform.

ADDITIONAL INFORMATION

Languages Known: English (Professional), Tamil (Native)
Interests: Open-source contribution, AI research, competitive programming, and building developer productivity tools.
Availability: Immediately available for internships and entry-level roles; open to on-site, remote, or hybrid positions; willing to relocate anywhere within India.
