SUMMARY

I develop strong, industry-ready skills through real-world projects, not just theory. I learn new technologies quickly and deliver high-quality, unique solutions that consistently exceed expectations. My ability to innovate, improve productivity, and contribute at a higher standard makes me a valuable asset in this domain.

EDUCATION

- **SSLC** | 64%
- **HSC** | 74%
- **Mahendran Institute of Engineering and Technology** | B.E / Computer Science and Engineering
- **CPGPA** | 7.8
- **BATCH** | 2025

LANGUAGES

English ●●●●●

Tamil Native ●●●●●

SKILL STACK

Frontend Development

- React.js (Hooks, Components, State Management)
- Figma
- Flutter

Backend Development

- Python (Flask)
- REST API Development
- Java

Database & Cloud

- Firebase
- Render & Netlify Deployment
- Git & GitHub

Mobile & App Development

- Flutter (Cross-platform UI)
- Firebase (Auth + DB + etc...)
- Kotlin

Data Science

- Machine Learning, Deep Learning, NLP
- Data Pre-processing, EDA, Data Visualization
- Statistical Analysis, Reporting
- Power BI, Advanced Excel

Design & Creative Tools

- Photoshop CS6
- CorelDRAW
- Figma
- Blender
- Canva

AI & Generative AI

- LLMs, Generative AI, Prompt Engineering, RAG, Agentic AI, AI Agents, NLP

AI - TOOLS & AGENT

CHAT-GPT Trainner | **GEMINI** Personal Assistant | **CLAUDE** Coding partner | **COPILOT** General Tasks | **OPEN CODE** Planning

PROJECTS

Marriage Invitation and Birthday wishes

Nov 21, 2025

A highly personalized, responsive web application designed for event celebrations. Features custom CSS animations, DOM manipulation for interactive elements, and a mobile-first design philosophy.

Live on : https://Unfoldly.netlify.app

Personal Portfolio Web Application

Dec 6, 2025

A dynamic, real-time portfolio application built with Firebase for live content updates and Netlify for high-performance deployment. It allows seamless updating of projects, achievements, and personal data without redeployment. Designed with strong SEO, fast loading, and a clean UI, it showcases my work professionally and serves as an evolving digital identity.

Sales Analytics System with Machine Learning

Oct 23, 2025

This project is a comprehensive Sales Analytics System that combines advanced data processing, machine learning models, and interactive visualization to analyze sales data and provide business intelligence insights.

Live on : https://salesmlmodel.streamlit.app/

Spodude (AI Based Music Streaming App)

Sep 2, 2025 - Till

Integrated Gemini AI to categorize music tracks and fetch synced lyrics automatically, enhancing the user experience with real-time data.

Live on : Spodude.netlify.app

Real time integration of Excel with chatbot

May 28, 2025

Developed an NLP-powered chatbot integrating the Google Sheets API for real-time data querying and Firebase for secure user authentication. Streamlined data retrieval processes by enabling natural language queries on spreadsheet data.

Business Management Web Application with AI Agent

April 28, 2025

Developed a production-ready web application using Supabase and AI agents to automate bookings, cancellations, appointments, and audit processes, streamlining business operations and improving workflow efficiency.
