DHANALAKSHMI M

Erode, Tamil Nadu | +91 99447 11572 | dhanuroo11@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student with a CGPA of 9.211 (as of 6th Semester) and strong foundations in Java, Data Structures, Algorithms, and Object-Oriented Programming. Skilled in full-stack web development (HTML, CSS, JavaScript) and Android development (Kotlin, Android Studio), with hands-on experience freelancing on website development and hosting projects. Solved 300+ LeetCode problems and built IoT and embedded systems projects. Strong communicator, passionate about software development, and eager to apply problem-solving and programming skills to real-world technology projects.

EDUCATION

B.E. Electronics and Communication Engineering 2023 – 2027
Nandha Engineering College (Autonomous), Erode, Tamil Nadu
CGPA: 9.211 (as of 6th Semester) | Currently in 4th Year

Higher Secondary (12th Grade — Science) 2023
Sri Vijay Vidyalaya Matric Hr. Sec School (Girls), Dharmapuri
Percentage: 92%

TECHNICAL SKILLS

Programming Language: Java, HTML, CSS, JavaScript, Python (Intermediate), SQL (Intermediate), Kotlin (Intermediate)

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Computer Networking, Problem Solving

App & Web Development: Android Studio, Website Development & Hosting

Developer Tools: Git, GitHub, VS Code

Embedded & IoT: Microcontrollers & Microprocessors, Sensor Integration, Embedded Systems, ESP32, Arduino IDE

EDA Tools: Proteus, KiCad

Soft Skills: Good Communication Skills

FREELANCE EXPERIENCE

Freelance Web Developer

- Design, develop, and deploy websites for clients, handling both front-end development and hosting.
- Manage end-to-end delivery — from requirements gathering to deployment and post-launch support.

PROJECTS

Real-Time Water Consumption Monitoring and Cost Analysis System Using ESP32 | *Personal Project*
2026

- Built an IoT-enabled water management system capable of monitoring real-time water usage for multiple consumers, calculating consumption costs, and providing remote access through a cloud dashboard.

Motor Dry Run Protection for Borewell Pumps | *Personal Project* 2025

- Developed a protection system that continuously monitors current and voltage to detect dry-run conditions early, automatically cutting motor power to prevent overheating.

INTERNSHIP EXPERIENCE

Embedded Systems Intern | ChipCrafts Pvt. Ltd, Coimbatore *2025 | 14 Days*

- Worked hands-on with sensor integration and microcontroller-based circuit development across multiple project modules.
- Used Proteus and KiCad for circuit simulation and PCB layout design.

Industrial Training | Kudankulam Nuclear Power Plant, Tamil Nadu *2026 | 14 Days*

- Studied instrumentation and control systems used in nuclear power generation, gaining exposure to high-precision electronics in critical infrastructure settings.

ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

- Led a marketing team for the college's National Level Technical Symposium.
- Internet of Things in Industry 4.0 — NPTEL (Silver Badge, 2026)
- Completed NPTEL course in Ethical Hacking
