LOGESHWARAN M

Computer Science and Engineering Student | Aspiring Java Full Stack Developer

+91-7603993833 | logeshwaranm180@gmail.com | linkedin.com/in/logeshwaranm

SUMMARY

Final-year Computer Science student seeking a Fresher Java Full Stack Developer role. Quick learner with strong adaptability and problem-solving skills, hands-on project experience across Java, Spring Boot, and modern AI-assisted development tools, and a strong interest in building scalable, real-world software solutions.

SKILLS

Programming & Scripting: Java, C, JavaScript, TypeScript, PowerShell, HTML5, CSS3, XML
Software Engineering: Object-Oriented Programming (OOP), Software Testing, Debugging, Data Structures & Algorithms (DSA), REST APIs, Technical Documentation
Version Control & CI/CD: Git, GitHub, GitLab, CI/CD Pipelines
Frameworks & Databases: Spring Boot, React, Node.js, Bootstrap, Tailwind CSS, MySQL, MongoDB, Supabase
Tools & Deployment: Ollama, n8n, Google AI Studio, Antigravity, Vercel, Render, Netlify

PROJECTS

LocalDesk AI – Local AI File Management Assistant 2026 – Present

Ollama, n8n, Everything Search, PowerShell, HTML, CSS, JavaScript

- Built a local AI assistant that converts natural-language commands into real Windows file operations: create, copy, move, rename, delete, and search files and folders, and check disk space.
- Automated workflows using n8n and PowerShell scripts with fast file search via Everything Search, plus workspace protection, activity logging, and Agent ON/OFF control.
- Configured Windows startup automation and a web-based control interface, connecting local AI with real desktop automation instead of text-only output.

LOKEY-AI May 2026 – Jun 2026

React, Node.js, TypeScript, AI Integration, Vercel, Render

- Built an AI-powered student assistant that provides personalized academic guidance, study planning, and career support with multilingual capabilities.
- Developed a responsive conversational chat interface with memory to deliver context-aware, natural, and engaging interactions.
- Designed an intuitive user experience to help students clarify doubts, track learning progress, and receive AI-driven recommendations for academic success.

PlanX (V-OS Alpha) Apr 2026 – May 2026

Kotlin, Jetpack Compose, Room Database, AI-Assisted Development

- Developed an offline-first personal workspace application that helps users manage productivity, notes, finances, fitness, and daily tasks through a unified dashboard.
- Implemented offline voice command support (English & Tamil), local file management, Pomodoro timer, secure note-taking, and personal finance tracking while ensuring user data remains private using local storage and Room Database.
- Designed a modular and customizable workspace interface with draggable productivity widgets, integrating AI-assisted development tools such as ChatGPT, Google AI Studio, and OpenRouter to accelerate UI design, feature planning, debugging, and development workflows.

INTERNSHIP

Java Programming Intern | CodeAlpha Dec 2025 – Jan 2026

- Strengthened Java programming and problem-solving skills through virtual internship projects.

Java Programming Intern | CodSoft Sep 2025 – Oct 2025

- Completed a Java programming internship and improved coding logic and development skills.

CERTIFICATIONS

- Java Full Course – Livewire (Completed)
- Java with AI Master Class – Ocean Academy
- Junior Grade Typewriting (English) – Government Technical Examinations
- Ideathon 2026 – Participation Certificate
- Machine Learning Workshop – Sona College of Technology | 27 February 2025

EDUCATION

Bachelor of Engineering in Computer Science and Engineering Graduating: 2027

Mahendra Institute of Technology | CGPA: 8.11 / 10
