SUMMARY

Motivated **Artificial Intelligence and Data Science undergraduate** with strong skills in **Python, Machine Learning, Deep Learning**. Seeking an **entry-level IT / Software Developer / AI role** to apply problem-solving abilities, develop scalable solutions, and contribute to real-world projects while continuously enhancing technical expertise.

EDUCATIONS

B.Tech – Artificial Intelligence and Data Science
Sengunthar Engineering College | 2022 – 2026 (Completed)
CGPA: 7.485

Higher Secondary Certificate (HSC)
Einstein Matriculation Higher Secondary School | 2022
Percentage: 73.6

Secondary School Leaving Certificate (SSLC)
Holy Cross Matriculation Higher Secondary School | 2020
Percentage: 77.2

PROJECTS

Fake News Detection using LSTM

Python, TensorFlow, Keras, NLP

- Developed a deep learning–based fake news detection system using **Long Short-Term Memory (LSTM)** networks.
- Applied NLP preprocessing techniques including tokenization, stopword removal, and sequence padding.
- Trained the model on labeled news datasets to classify news as **Real or Fake**.
- Achieved high accuracy in binary text classification through effective sequence learning.
- Designed the solution to support **real-time prediction** and future API-based deployment.
