# MANOJ S

Software Test Engineer | Manual, API & Automation Testing

+91 6374765306 | manojsaravanan0902@gmail.com | Erode, Tamil Nadu | LinkedIn | GitHub | HackerRank

## PROFESSIONAL SUMMARY

Software Test Engineer with 2+ years of combined experience (including internships) in manual testing of web applications. Skilled in requirement analysis, test scenario and test case design, functional, regression and integration testing, verification and validation, and defect tracking using JIRA. Working knowledge of SQL databases (MySQL, PostgreSQL), REST API testing with Postman and Selenium (Java) automation. Strong analytical and troubleshooting skills, attention to detail and clear written and verbal communication; experienced in Agile/Scrum sprint planning, reviews and defect triage with developers and product owners.

## TECHNICAL SKILLS

**Testing:** Manual Testing, Software Verification & Validation, STLC, Defect Life Cycle, Requirement Analysis, Test Planning, Test Scenarios, Test Cases, Test Coverage, Functional Testing, Integration Testing, Regression Testing, System Testing, Smoke & Sanity Testing, Cross-Browser Testing, Troubleshooting

**API & Data:** SQL, MySQL, PostgreSQL, MongoDB, Postman (REST API validation)

**Automation:** Selenium WebDriver, Java, TestNG, Maven, Page Object Model, Data-Driven Framework, JavaScript

**Tools:** JIRA (defect tracking & test management), Git, GitHub, Eclipse, VS Code, MS Excel/Word

**Process:** Agile/Scrum – sprint planning, daily stand-ups, defect triage, sprint reviews, release testing

## PROFESSIONAL EXPERIENCE

**QA Engineer | Yuvaasoft Technologies Pvt. Ltd.** *Nov 2025 – Present*

- Analyse requirements, functional specifications and user stories to design test scenarios and test cases that give complete coverage of application features.
- Perform **functional**, **integration**, **regression**, **smoke** and **sanity** testing, plus cross-browser and responsive checks, before every release.
- Log, prioritise and retest defects in **Jira** with clear reproduction steps and evidence; analyse and isolate issues, work with developers on resolution and verify fixes during regression cycles.
- Validate REST APIs with **Postman** and verify data integrity with **SQL** queries; automate repetitive scenarios using **Selenium WebDriver (Java)**.
- Maintain test cases, execution reports, defect reports and release validation reports; active in sprint planning, stand-ups, reviews and retrospectives.

***Projects tested:***

- **Regional AI Summit 2.0 (RAS 2.0)** – multi-event registration and payment platform (Django, PostgreSQL): tested end-to-end registration flows (Delegate Pass, Hackathon, AI Film Fest, AI Brand Ads Challenge, Project Pitching); validated Razorpay payment success/failure scenarios, early-bird pricing rules, invoice PDF generation and CGST/SGST (9% + 9%) calculations; verified records in PostgreSQL using SQL.
- **Yuvaasoft HRM System** – 11-module Django application: performed functional, integration and regression testing across modules and validated data flow between them; tracked defects through to closure in Jira.
- **Audit Desk Dashboard** – Django + Chart.js: validated chart and dashboard figures against backend data after migration from static mock data to backend-driven JSON; ran regression on affected screens.
- **GoFinicky SmartDesk CRM (product page)** – UI, responsive and cross-browser testing of the pricing section, animations and content changes across browsers and screen sizes.

**Software Test Engineer (Intern) | XtrazCon Technology Pvt. Ltd.** *Sep-2025 – Nov 2025*

- Created and executed functional, regression, smoke and sanity test cases for web applications.
- Reported and tracked defects, supported requirement analysis, and maintained test documentation in an Agile team.

**Software Tester (Intern) | KGiSL** *May 2025 – Aug 2025*

- Executed manual test cases for functional and regression coverage; wrote Selenium (Java) scripts for key workflows.
- Performed API testing with Postman and SQL validation; reported defects and worked with developers on fixes.

**Associate – QA | DNS Gaming, Bengaluru** *Jun 2023 – Sep 2024*

- Tested game builds, identified and reported defects, and worked with the team to verify fixes before release.

## PROJECTS

**OpenCart E-commerce – Manual Testing:** Designed and executed 200+ test cases; performed cross-browser, UI and regression testing; tracked defects in Jira.

**OpenCart E-commerce – Automation Testing:** Built a Selenium + Java + TestNG framework using Page Object Model; managed builds with Maven; generated TestNG reports for browser-specific regression runs.

## EDUCATION & CERTIFICATIONS

**B.E. Computer Science and Engineering** – Builders Engineering College, Tiruppur (Anna University), 2021–2024, CGPA 8.10/10

**Certifications:** Manual and Automation Testing (KGiSL, 2025) | Full Stack Development (KGiSL, 2024–25) | AR & VR (Nandha Infotech, 2022)

**Languages:** English, Tamil
