OBJECTIVE

Biomedical Engineer passionate about software development, Healthcare IT and database management, seeking an entry-level role in IT and software solutions.

SKILLS

Technical Skills: Java, Medical Coding.

Soft Skills: Communication, Leadership, Problem Solving, Teamwork.

PROJECTS

Project 1: Smart Dehydration Warning System

- Developed a Personalized Time-Based Dehydration Warning System using Arduino Nano, DHT11 humidity sensor, and DS3231 RTC.
- Designed an automatic alert system using LED and buzzer to remind users to drink water based on environmental humidity and time intervals.

Project 2: IOT - Based Swallowing Pattern Tracker

- Developed an IoT-Based Swallowing Pattern Tracker for Dysphagia Monitoring using embedded sensors and a microcontroller.
- Designed a real-time swallowing monitoring system to detect swallowing patterns and support early identification of swallowing difficulties.

EDUCATION

B.E Biomedical Engineering

Kongunadu College of Engineering and Technology, Trichy 2023 – 2027

CGPA: 7.8

ACHIVEMENTS

- Secured Runner-up position in the hackathon, competing at innovation event held at KPR Collage in Coimbatore.
- Achieved Runner-up in an intra-college hackathon for developing an innovative technical solution.

CERTIFICATIONS

- Java – Yellow Matics
- Medical Coding-ThoughtFlow
